Passing with a high score vastly increases your chances of getting to the top. Why leave it to chance? Score this book now and score big in the future! Are you training to be a DVSA Approved Driving Instructor and confused by the amount of resources there are out there. This book has been written by Me, Kathleen Kirkland, to assist those taking their part three exam. It is written with each pre set test in a role-play scenario. People learn by four different methods; visual, audio, reading or kinaesthetic or a mixture of several. This book will assist those that learn by reading or a mixture of several methods. It can supplement other learning resources that you have already. I feel the role play scenarios, give a foundation of understanding useful for you to comprehend how a lesson is structured and how the phase one and phase two differ significantly. Also within the lessons plans are the timing that should be spent on the briefing, question and answers and practice of each lesson. PDI's that have been training with my school for many years have been using these PST dialogues and have found them extremely helpful. This is the reason why I have decided to start selling the book on the open market for other PDI's to benefit. The lessons are set out in the pre-set test (PST) order; there are ten PST's in total. Each divided into two lesson plans. Phase one is for a beginner or partly trained learner and phase two for a trained learner. Each PST lesson is labelled (a) for phase one and (b) for phase two, for example: Lesson 1a - Controls and the main driving aids of the car. Lesson 1b - Crossroads. The lesson plans have been written with a full dialogue for each topic. The lessons do not need to be read as a script, they should be adjusted with your own terminology and characteristics. Notes for you, the Instructor are shown in *Italic*. These notes are to give you guidance on the particular point in the PST. For each PST there is a note for which rule of The Highway Code and lesson diagram to use in conjunction with the lesson. The lesson diagrams that I use are the 'colour file professional lesson diagram, produced by the DIA (Driving Instructors Association)'. The colour file professional's and other training resources are available to purchase from my website www.kathleensom.co.uk. You can of course use any lesson diagrams you so choose, although you will need to work out yourself, which diagrams are to be used with each PST. "The goal of this research project was to develop a methodology to assist the Wisconsin Department of Transportation (WisDOT) in the evaluation of effectiveness of teen driver education programs over the short and long terms. The research effort was divided into two phases. Phase I focused on the development of an evaluative methodology that was based upon a review of the relevant literature and Wisconsin-specific policies and available data sources. This review culminated in a program assessment tool focused on four contributing areas of teen driver training and education: 1) Guardian Involvement; 2) Driver Education and Training Curricula Requirements; 3) GDL Coordination; and 4) Instructor Qualifications. The proposed methodology was presented to the Project Oversight Committee and was validated through two rounds of pilot testing using materials provided by programs and schools under the oversight of both WisDOT and the Wisconsin Department of Public Instruction. The resulting methodology informed the Phase II implementation plan recommendations. Work products included within this report are an annotated bibliography; a knowledge base documenting best practices and Wisconsin-specific data sources; a methodology that may be used to analyze and evaluate the effectiveness of driver-training programs as they relate to the demonstrated safety and behavior of teen drivers in Wisconsin; and a three-phase implementation plan."--Technical report documentation page.
