Hidden in the Home Jun 24 2020 This book combines a case study of industrial homework in the electronics industry with a world-systems approach to understanding the role of home-based work in economic development. It spans the period from the nineteenth-century origins of industrial homework to the important role played by home-based work in current strategies of economic restructuring in manufacturing and service industries. The author draws a clear distinction between industrial homework and earlier forms of domestic labor, such as the putting-out system. She also clarifies the important differences between various forms of contemporary home-based work: waged homework in industrial and service occupations, professional telecommuting, home-based self-employment. Moving from the lives of homeworkers themselves to macro-level analyses, Dangler's case study provides a vantage point from which to examine theories of world economic development, theories of labor market segmentation, and recent analyses of the importance of informal sector activities in the modern economy.

Stories of House and Home Jul 06 2021 *Stories of House and Home* is a social and cultural history of the massive construction campaign that Khrushchev instituted in 1957 to resolve the housing crisis in the Soviet Union and to provide each family its own apartment. Decent housing was deemed the key to a healthy, productive home life, which was essential to the realization of socialist collectivism. Drawing on archival materials, as well as memoirs, fiction, and the Soviet press, Christine Varga-Harris shows how the many aspects of this enormous state initiative—from neighborhood planning to interior design—sought to alleviate crowded, undignified living conditions and sculpt residents into ideal Soviet citizens. She also details how individual interests intersected with official objectives for Soviet society during the Thaw, a period characterized by both liberalization and vigilance in everyday life. Set against the backdrop of the widespread transition from communal to one-family living, *Stories of House and Home* explores the daily experiences and aspirations of Soviet citizens who were granted new apartments and those who continued to inhabit the old housing stock due to the chronic problems that beset the housing program. Varga-Harris analyzes the contradictions apparent in heroic advances and seemingly inexplicable delays in construction, model apartments boasting modern conveniences and decrepit dwellings, happy housewarmings and disappointing moves, and new residents and individuals requesting to exchange old apartments. She also reveals how Soviet citizens

identified with the state and with the broader project of building socialism.

Country Cottage Conservation May 04 2021 Country Cottage Conservation is essential reading for everyone who loves rural cottages. From simple DIY redecoration to employing architects and builders to tackle significant repairs, this book is full of helpful information. The author explains how cottage owners are able to protect and enhance their investment,

and discusses various repair and redecoration options and their consequences. The charm and long life of a traditional cottage comes from over a thousand years of building tradition that was almost forgotten in the twentieth century. Modern materials and techniques are often expensively inappropriate, as they can conflict with the buildings' inbuilt defence mechanisms or make cottages look too modern, yet it is still possible to repair a cottage economically with traditional methods and natural materials that work in harmony with the original construction. The author also considers what may be done to redress the balance where inappropriate work has previously been carried out, so as to restore some of the original performance to the cottage and help preserve its charm, and value, for the future. Essential reading for everyone who loves country cottages and invaluable for those who want to maintain and repair their property in a sympathetic and sustainable way, it is also superbly illustrated with 239 colour photographs.
