Exploring the growth of the Marines from disadvantaged to elite force, this history “offers an excellent analysis of how the marines became the Marines.” (Publishers Weekly) The Marine Corps has always considered itself a breed apart. This undying faith in its own exceptionalism is what has made the Marines one of the sharpest, swiftest tools of American military power. Aaron O’Connell focuses on the period from World War II to Vietnam, when the Marine Corps transformed itself from America’s least respected to its most elite armed force. Venerating sacrifice and suffering, privileging the collective over the individual, Corps culture was saturated with romantic and religious overtones that had enormous marketing potential in a postwar America energized by new global responsibilities. Capitalizing on this, the Marines curried the favor of the nation’s best reporters, befriended publishers, courted Hollywood and Congress, and built a public relations infrastructure that would eventually brand it as the most prestigious military service in America. But as O’Connell suggests, the Corps’ triumphs did not come without costs, including a culture of violence that sometimes spread beyond the battlefield. “A significant and original contribution

to both the military history of the Cold War and the ongoing conversation about the militarization of American culture.” —Beth Bailey, author of *America's Army: Making the All-Volunteer Force* “Takes readers inside the culture of the Corps.” —Nathaniel Fick, author of *One Bullet Away: The Making of a Marine Officer* “Insightful.” —Library Journal “A powerful account of the relationship between fighting war and preserving peace, viewed through the lens of the stories that built support for both.” —Kirkus Reviews “Absorbing.” —The Wall Street Journal “Closing In: Marines in the Seizure of Iwo Jima” by Joseph H. Alexander. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format. Unlike the relative uniformity of conventional warfare, the peculiarities of small wars prevent a clear definition of rules and roles for military forces to follow. During the small wars era, aviation was still in its infancy, and the US military had only recently begun battling in the skies. The US Marine Corps recognized that flexibility and ingenuity would be critical to the successful conduct of small wars and thus employed the new technology of aviation. In *Biplanes at War: US Marine Corps Aviation in the Small Wars Era, 1915–1934*, author Wray R. Johnson provides a riveting history of the marines' use of aviation between the world wars, a time in which young soldiers were volunteering to fly in combat when flying itself was a dangerous feat. Starting with Haiti in 1915, *Biplanes at War* follows the marines' aviation experiences in Haiti, the Dominican Republic, China, and Nicaragua, chronicling how marines used aircraft to provide supporting fires (e.g., dive-bombing) to ground troops in close contact with irregular opponents, evacuate the sick and wounded, transport people and cargo (e.g., to assist humanitarian operations), and even support elections in furtherance of democracy. After years of expanding the capabilities of airplanes far beyond what was deemed possible, the small wars era ended, and the US Marines Corps transitioned into an amphibious assault force. The legacy of the marines' ability to adapt and innovate during the small wars era endures and provides a useful case study. *Biplanes at War* sheds light on how the marines pioneered roles and missions that have become commonplace for air forces today, an accomplishment that has largely gone unrecognized in mainstream histories of aviation and air power.
