Grain legumes, including common-bean, chickpea, pigeonpea, pea, cowpea, lentil and others, form important constituents of global diets, both vegetarian and non-vegetarian. Despite this significant role, global production has increased only marginally in the past 50 years. The slow production growth, along with a rising human population and improved buying capacity has substantially reduced the per capita availability of food legumes. Changes in environmental climate have also had significant impact on production, creating a need to identify stable donors among genetic resources for environmentally robust genes and designing crops resilient to climate change. Genetic and Genomic Resources of Grain Legume Improvement is the first book to bring together the latest resources in plant genetics and genomics to facilitate the identification of specific germplasm, trait mapping and allele mining to more effectively develop biotic and abiotic-stress-resistant grains. This book will be an invaluable resource for researchers, crop biologists and students working with crop development. Explores origin, distribution and diversity of grain legumes Presents information on germplasm collection, evaluation and maintenance Offers insight into pre-breeding/germplasm enhancement efforts Integrates genomic and genetic resources in crop improvement Internationally contributed work A comprehensive guide to MEMS materials, technologies and manufacturing, examining the state of the art with a particular emphasis on current and future applications. Key topics covered include: Silicon as MEMS material Material properties and measurement techniques Analytical methods used in materials characterization Modeling in MEMS Measuring MEMS Micromachining technologies in MEMS Encapsulation of MEMS components Emerging process technologies, including ALD and porous silicon Written by 73 world class MEMS contributors from around the globe, this volume covers materials selection as well as the most important process steps in bulk micromachining, fulfilling the needs of device design engineers and process or development engineers working in manufacturing processes. It also provides a comprehensive reference for the industrial R&D and academic communities. Veikko Lindroos is Professor of Physical Metallurgy and Materials Science at Helsinki University of Technology, Finland. Markku Tilli is Senior Vice President of Research at Okmetic, Vantaa, Finland. Ari Lehto is Professor of Silicon Technology at Helsinki University of Technology,

Finland. Teruaki Motooka is Professor at the Department of Materials Science and Engineering, Kyushu University, Japan. Provides vital packaging technologies and process knowledge for silicon direct bonding, anodic bonding, glass frit bonding, and related techniques Shows how to protect devices from the environment and decrease package size for dramatic reduction of packaging costs Discusses properties, preparation, and growth of silicon crystals and wafers Explains the many properties (mechanical, electrostatic, optical, etc), manufacturing, processing, measuring (incl. focused beam techniques), and multiscale modeling methods of MEMS structures

SEE THE BIBLE IN A WHOLE NEW LIGHT! 99 Astonishing Cities and Civilizations Found in the Bible presents visual connections with biblical narratives: —Scale the Tower of Babel —Descend into the Valley of Dry Bones —Row the Red Sea —Marvel at the Mount of Olives —Travel across the Plains to Petra Illuminating and informative articles help you learn about real places mentioned in the Bible. Whether you're an arm-chair explorer or a seasoned world-traveler, you are sure to learn something new in these pages. 99 Astonishing Cities and Civilizations Found in the Bible is filled with captivating 4-color photographs, powerful renderings, and other rich images to highlight the stories of remarkable geographic locations found within the Bible Use this guide to get help with consumer purchases, problems and complaints. From the Mediterranean to the Alps, from fine art to fine pasta, experience Italy with the most up-to-date 2021 guide from Rick Steves! Inside Rick Steves Italy you'll find: Comprehensive coverage for planning a multi-week trip to Italy Rick's strategic advice on how to get the most out of your time and money, with rankings of his must-see favorites Top sights and hidden gems, from the Colosseum and Michelangelo's David to corner trattorias and that perfect scoop of gelato How to connect with local culture: Walk in Caesar's footsteps through the ruins of the Forum, discover the relaxed rhythms of sunny Cinque Terre, or chat with fans about the latest soccer match (calcio, to locals) Beat the crowds, skip the lines, and avoid tourist traps with Rick's candid, humorous insight The best places to eat, sleep, and experience la dolce far niente Self-guided walking tours of lively neighborhoods and museums Vital trip-planning tools, like how to link destinations, build your itinerary, and get from place to place Detailed maps, including a fold-out map for exploring on the go Useful resources including a packing list, Italian phrase book, historical overview, and recommended reading Updated to reflect changes that occurred during the Covid-19 pandemic up to the date of publication Over 1,000 bible-thin pages include everything worth seeing without weighing you down Coverage of Venice, Padua, the Dolomites, Lake Country, Milan, the Italian Riviera, Florence, Pisa, Lucca, Hill Towns of Central Italy, Siena, Tuscany, Rome, Naples, Pompeii, Capri, the Amalfi Coast, and much more Make the most of every day and every dollar with Rick Steves Italy. Planning a one- to two-week trip? Check out Rick Steves Best of Italy. Lots of Jacqueline Wilson's characters are well-known and well-loved by thousands of readers: Hetty Feather, Ruby and Garnet, Pearl and Jodie, Elsa, Lily and, of course, the brilliant Tracy Beaker! But how much do you know about Jacqueline herself? Jacqueline takes a look back at her own childhood and teenage years in this captivating story of friendships, loneliness, books, family life and much more. She explores her past with the same warmth and lightness of touch that make her novels so special. Best of all, she reveals how she was always determined to be a writer; from the very first story she wrote, it was clear that this little girl had a very vivid imagination! But who would've guessed that she would grow up to be the mega-bestselling, award-winning Jacqueline Wilson? With original photographs and new illustrations by Nick Sharratt, this book is a delight for all of Jacky's fans, and a treat for any new readers too. Do your desires have you going around in circles? You may be looking for fulfillment in all the wrong places. You vowed you'd never repeat the same mistakes—yet you find yourself right where you started. What is it that keeps drawing you back into the same old traps? The fact is, your longings are built from the blueprint of your needs: for protection, for love, for God. And those needs aren't going anywhere. Sheila speaks candidly about the trials in her life, including the heartache of her first marriage, and intertwines her story with the biblical saga of King David. As both Sheila's and David's stories make clear, some cravings are misguided, but they all stem from the same hunger—and they will haunt you until that hunger gets satisfied properly. If you keep reaching out to the wrong people at the wrong times in your own life, *The Longing in Me* will help you understand that your cravings are not the problem. It's where they lead you that makes all the difference. Report of a government investigation to better understand the role of digital trade -- domestic commerce and international trade conducted via the Internet -- in the U.S. and global economies, as well as the effects of barriers and impediments to digital trade that impede U.S. access to global markets. The

analysis provides findings at three levels: at the firm level, through 10 case studies; at the industry level, through a survey of U.S. businesses; and at the economy-wide level, using computable general equilibrium and econometric models. This analysis shows that digital trade contributes to economic output by improving productivity and reducing trade costs. Digital trade's combined effects of increased productivity and lower trade costs are estimated to have increased U.S. real GDP by \$517.1-\$710.7 billion (3.4-4.8%). Figures and tables. Phytoplasma-associated diseases are a major limiting factor to quality and productivity of many ornamentals, horticultural and other economically important agriculture crops worldwide. Annual losses due to phytoplasma diseases in many crops vary, but under the pathogen favorable conditions they always lead to disastrous consequences to farming community. As there is no effective cure for phytoplasma diseases, the management options emphasize on their exclusion, minimizing their spread by insect vectors and propagation materials and on development of host plant resistance. The phytoplasma associated plant diseases have a history of more than 50 years. Phytoplasmas have undoubtedly infected plants and cause diseases for centuries before they are described and proven to be the causal agents. But important progress related to identification of phytoplasmas only began after 1980's. Phytoplasmas have emerged as the most serious constraints in the production of several crops all around the world during last four decades. Phytoplasmas constitute a major limiting factor to quality and productivity of cereals, horticultural, ornamentals and many other economically important crops all over the world. Annual losses due to phytoplasma diseases may vary, but under the pathogen favorable condition, phytoplasma disease may lead to disastrous consequences for farming and industry community. The scientific literature concerning phytoplasma occurrence, characterization, diagnosis, detection, and management is growing at a fast pace. Significant advancement in the last decades on diagnostic, biological and molecular properties, epidemiology, host-pathogen-insect interactions as well as management of phytoplasmas has been made. Till date, no authentic compilation is available to know the progress of phytoplasmas characterization major crops all over the world. The planned book will compile all the updated information available information on phytoplasmas by distinguished experts in the form of edited book entitled "Characterization and epidemiology of phytoplasma associated diseases". The book covers recent and update information on emerging and re-emerging phytoplasma diseases affecting important crops in tropics and subtropics. It provides comprehensive information on disease distribution, occurrence, and identification of the phytoplasmas including the recent approaches for diagnostics, transmission, and information about losses and geographical distribution along with and management aspects. This volume contains 11-12 chapters contributed by the experienced and recognized experts working on different group of phytoplasmas affecting major crops all over the world. The information on various topics is at advanced as well as comprehensive level and provides the period wise developments of phytoplasma research. The book covers major chapters on an up to date progress of phytoplasma research, and then phytoplasma diseases associated with vegetable, pulse, oils crops, cereals, sugar crops, fruit crops, ornamentals, medicinal plants, palms species, forest tress and weeds. We have covered historical background, geographical distribution, identification and characterization, genetic diversity, host pathogen interaction and management aspects of important phytoplasma diseases infecting our major agricultural crops. The information on various topics is advanced as well as comprehensive, and provides thought provoking ideas for planning novel research ideas for future. This book will be useful to everyone interested in mollicutes, phytoplasma, spiroplasmas, plant pathology, disease control and plant biology and serve as an exhaustive and up-to-date compendium of references on various aspects of different groups of phytoplasmas affecting important crops worldwide.

Res Gestae Divi Augusti (Eng. The Deeds of the Divine Augustus) is the funerary inscription of the first Roman emperor, Augustus, giving a first-person record of his life and accomplishments. The Res Gestae is especially significant because it gives an insight into the image Augustus portrayed to the Roman people. Various inscriptions of the Res Gestae have been found scattered across the former Roman Empire. The inscription itself is a monument to the establishment of the Julio-Claudian dynasty that was to follow Augustus. The text consists of a short introduction, 35 body paragraphs, and a posthumous addendum. These paragraphs are conventionally grouped in four sections, political career, public benefactions, military accomplishments and a political statement. The first section (paragraphs 2-14) is concerned with Augustus' political career; it records the offices and political honours that he held. Augustus also lists numerous offices he refused to take and privileges he refused to be awarded. The second section (paragraphs 15-24) lists Augustus'

donations of money, land and grain to the citizens of Italy and his soldiers, as well as the public works and gladiatorial spectacles that he commissioned. The text is careful to point out that all this was paid for out of Augustus' own funds. The third section (paragraphs 25-33) describes his military deeds and how he established alliances with other nations during his reign. Finally the fourth section (paragraphs 34-35) consists of a statement of the Romans' approval for the reign and deeds of Augustus. The appendix is written in the third person, and likely not by Augustus himself. It summarizes the entire text, and lists various buildings he renovated or constructed; it states that Augustus spent 600 million silver denarii (i.e. 600,000 gold denarii) from his own funds during his reign on public projects. Ancient currencies cannot be reliably converted into modern equivalents, but it is clearly more than anyone else in the Empire could afford. Augustus consolidated his hold on power by reversing the prior tax policy beginning with funding the *aerarium militare* with 170 million sesterces of his own money.

Implement machine learning and deep learning methodologies to build smart, cognitive AI projects using Python Key Features A go-to guide to help you master AI algorithms and concepts 8 real-world projects tackling different challenges in healthcare, e-commerce, and surveillance Use TensorFlow, Keras, and other Python libraries to implement smart AI applications Book Description This book will be a perfect companion if you want to build insightful projects from leading AI domains using Python. The book covers detailed implementation of projects from all the core disciplines of AI. We start by covering the basics of how to create smart systems using machine learning and deep learning techniques. You will assimilate various neural network architectures such as CNN, RNN, LSTM, to solve critical new world challenges. You will learn to train a model to detect diabetic retinopathy conditions in the human eye and create an intelligent system for performing a video-to-text translation. You will use the transfer learning technique in the healthcare domain and implement style transfer using GANs. Later you will learn to build AI-based recommendation systems, a mobile app for sentiment analysis and a powerful chatbot for carrying customer services. You will implement AI techniques in the cybersecurity domain to generate Captchas. Later you will train and build autonomous vehicles to self-drive using reinforcement learning. You will be using libraries from the Python ecosystem such as TensorFlow, Keras and more to bring the core aspects of machine learning, deep learning, and AI. By the end of this book, you will be skilled to build your own smart models for tackling any kind of AI problems without any hassle. What you will learn Build an intelligent machine translation system using seq-2-seq neural translation machines Create AI applications using GAN and deploy smart mobile apps using TensorFlow Translate videos into text using CNN and RNN Implement smart AI Chatbots, and integrate and extend them in several domains Create smart reinforcement, learning-based applications using Q-Learning Break and generate CAPTCHA using Deep Learning and Adversarial Learning Who this book is for This book is intended for data scientists, machine learning professionals, and deep learning practitioners who are ready to extend their knowledge and potential in AI. If you want to build real-life smart systems to play a crucial role in every complex domain, then this book is what you need. Knowledge of Python programming and a familiarity with basic machine learning and deep learning concepts are expected to help you get the most out of the book This book gathers high-quality papers presented at the Fifth International Conference on Smart Trends in Computing and Communications (SmartCom 2021), organized by Global Knowledge Research Foundation (GR Foundation) from March 2 – 3, 2021. It covers the state of the art and emerging topics in information, computer communications, and effective strategies for their use in engineering and managerial applications. It also explores and discusses the latest technological advances in, and future directions for, information and knowledge computing and its applications. The 2001 edition of Machine Trades Print Reading text is designed to help students develop the basic skills required for visualizing and interpreting industrial prints. The first four chapters present instruction in the fundamentals of print reading: visualizing shapes, line usage, title blocks, and print production. Remaining chapters introduce and explain details common to industrial prints. The final chapter contains comprehensive review quizzes. This book gathers high-quality papers presented at the International Conference on Smart Trends for Information Technology and Computer Communications (SmartCom 2020), organized by the Global Knowledge Research Foundation (GR Foundation) from 23 to 24 January 2020. It covers the state-of-the-art and emerging topics in information, computer communications, and effective strategies for their use in engineering and managerial applications. It also explores and discusses the latest technological advances in, and future directions for, information and knowledge computing and its applications. Now fully updated to the new release of Adobe's Creative Suite,

Exploring Photoshop CS4 shows how to use a great software tool to create dynamic design. Written by an author who is an experienced designer as well as computer graphics instructor, Exploring Photoshop CS4 is a designer-driven resource that examines the tools and features of Adobe Photoshop while showing how to maximize the potential of desktop digital imaging for graphics, illustration, composition, and special effects. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Definitive guide to implementing, managing and troubleshooting Linux networks. Detailed coverage of Linux routing, file management, directory services, security and internetworking with Samba. This book presents a set of modern protocols forming a solid background for who want to start or improve research programme on phytoplasmata. Chapters guide readers through detailed techniques for maintaining phytoplasmata collections, border inspection, detection of different phytoplasmata strains, new pipelines to produce phytoplasmata genome draft, protocols for phytoplasmata gene expression analyses, and methods for the investigation of the phloem tissue. Written in the highly successful Methods in Molecular Biology series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Authoritative and cutting-edge, Phytoplasmata: Methods and Protocols aims to ensure successful results in the further study of this vital field. This book is the first of a series of How To Pass OSCP books and focus on techniques used in Windows Privilege Escalation. This is a step-by-step guide that walks you through the whole process of how to escalate privilege in Windows environment using many common techniques. We start by gathering as much information about the target as possible either manually or using automated scripts. Next, we search for misconfigured services or scheduled tasks, insufficient file permission on binaries or services, vulnerable kernel, vulnerable software running with high privileges, sensitive information stored on local files, credential saved in the memory, registry settings that always elevate privileges before executing a binary, hard-coded credential contained in the application configuration files, and many more.

The use of microcontroller based solutions to everyday design problems in electronics, is the most important development in the field since the introduction of the microprocessor itself. The PIC family is established as the number one microcontroller at an introductory level. Assuming no prior knowledge of microprocessors, Martin Bates provides a comprehensive introduction to microprocessor systems and applications covering all the basic principles of microelectronics. Using the latest Windows development software MPLAB, the author goes on to introduce microelectronic systems through the most popular PIC devices currently used for project work, both in schools and colleges, as well as undergraduate university courses. Students of introductory level microelectronics, including microprocessor / microcontroller systems courses, introductory embedded systems design and control electronics, will find this highly illustrated text covers all their requirements for working with the PIC. Part A covers the essential principles, concentrating on a systems approach. The PIC itself is covered in Part B, step by step, leading to demonstration programmes using labels, subroutines, timer and interrupts. Part C then shows how applications may be developed using the latest Windows software, and some hardware prototyping methods. The new edition is suitable for a range of students and PIC enthusiasts, from beginner to first and second year undergraduate level. In the UK, the book is of specific relevance to AVCE, as well as BTEC National and Higher National programmes in electronic engineering. · A comprehensive introductory text in microelectronic systems, written round the leading chip for project work · Uses the latest Windows development software, MPLAB, and the most popular types of PIC, for accessible and low-cost practical work · Focuses on the 16F84 as the starting point for introducing the basic architecture of the

PIC, but also covers newer chips in the 16F8X range, and 8-pin mini-PICs

### DISCOVER CURIOUS AND THOUGHT-PROVOKING STORIES AND SECRETS OF ANCIENT TIMES

Uncover clues about 99 of the most intriguing puzzles found in the Bible. —Where was the Garden of Eden? —How did the Red Sea part? —What made the walls of Jericho tumble down? —Are there unicorns in the Bible? —Did Lazarus really rise from the dead? Within these pages, examine these perplexing questions and many more by looking at historical, cultural, archeological, and other significant details. You'll be sure to enjoy the quests within 99 Ancient Secrets and Mysteries of the Bible Explored. This easy-to-use guide covers troubleshooting tips and tricks for Mac hardware and software, written by the well-known Macworld columnist and Macintosh guru Chris Breen. The book contains troubleshooting tips and techniques for both Mac OS 9 and OS X, and additional projects for making a Macintosh more productive-sharing files, making Mac OS X work more like Mac OS 9, and more. If you are an expert Perl programmer interested in penetration testing or information security, this guide is designed for you. However, it will also be helpful for you even if you have little or no Linux shell experience. How can you purchase the content of my website in its June 2020 version? This here it is a really expensive pdf-file that you can buy to support me because it is a conceptual project designed to create benefits. On the actual website, you can look around and find a way to acquire a signed and dedicated printed version of the book. Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.

### Korean: A Comprehensive Grammar

is a reference to Korean grammar, and presents a thorough overview of the language, concentrating on the real patterns of use in modern Korean. The book moves from the alphabet and pronunciation through morphology and word classes to a detailed analysis of sentence structures and semantic features such as aspect, tense, speech styles and negation. Updated and revised, this new edition includes lively descriptions of Korean grammar, taking into account the latest research in Korean linguistics. More lower-frequency grammar patterns have been added, and extra examples have been included throughout the text. The unrivalled depth and range of this updated edition of Korean: A Comprehensive Grammar makes it an essential reference source on the Korean language.

### Ethics is at the heart of leadership.

All leaders assume ethical burdens and must make every effort to make informed ethical decisions and foster ethical behavior among followers. The Sixth Edition of Meeting the Ethical Challenges of Leadership: Casting Light or Shadow explores the ethical demands of leadership and the dark side of leadership. Author Craig E. Johnson takes a multidisciplinary approach to leadership ethics, drawing from many fields of research to help readers make moral decisions, lead in a moral manner, and create an ethical culture. Packed with real-world case studies, examples, self-assessments, and applications, this fully-updated new edition is designed to increase students' ethical competence and leadership abilities.

### Hayden Lake: A Brief Primer

describes the popular North Idaho Lake and its watershed. The book deals with matters as simple as access to the lake and its watershed. The book describes of the complex underlying geology of the lake and its immediate surroundings, the flora and fauna of the lake and its watershed and a brief history of man's impacts on the lake and watershed. Building on these elements the inner workings of the lake and watershed's hydrology, limnology, and aquatic biota is discussed. A final chapter outlines the challenges and opportunities in managing the quality of the watershed and the lake into the future. A 'how to' for engaging in effective spiritual warfare

### Right-of-Way and Real Estate (US Federal Highway Administration Regulation) (FHWA) (2018 Edition)

The Law Library presents the complete text of the Right-of-Way and Real Estate (US Federal Highway Administration Regulation) (FHWA) (2018 Edition). Updated as of May 29, 2018 The FHWA is revising its regulations governing the acquisition, management, and disposal of real property for transportation programs and projects receiving funds under title 23, United States Code. The revisions are prompted by enactment of the Moving Ahead for Progress in the 21st Century Act

(MAP-21). Section 1302 of MAP-21 includes new early acquisition flexibilities that can be used by State departments of transportation (SDOT) and other grantees of title 23 Federal-aid highway program funds. This final rule addresses the use of those new early acquisition flexibilities. The FHWA is also updating the real estate regulations to reflect the agency's experience with the Federal-aid highway program since the last comprehensive rulemaking for part 710, which occurred more than a decade ago. The update clarifies the Federal-State partnership, streamlines processes to better meet current Federal-aid highway program needs, and eliminates duplicative and outdated regulatory language. The enactment of the Fixing America's Surface Transportation (FAST) Act had a minimal effect on this rule. This book contains: - The complete text of the Right-of-Way and Real Estate (US Federal Highway Administration Regulation) (FHWA) (2018 Edition) - A table of contents with the page number of each section This volume presents new developments in the field of mass spectrometry imaging, covering imaging, software, data analysis, new instrumentations, and new methodological approaches. Chapters provide detailed operational instructions from sample preparation to method selection, from comparative quantification to structural identification and from data collection to visualization of small molecule mapping in complex samples. Written in the highly successful Methods in Molecular Biology series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Authoritative and cutting-edge, Mass Spectrometry Imaging of Small Molecules aims to bring the rapidly maturing methods of metabolic imaging to life science researchers and to minimize technical intimidation in adapting new technological platforms in biological research.
