Being a Dog Jan 09 2022 From the #1 bestselling author of *Inside of a Dog*—"an incredible journey into the olfactory world of man's best friend" (O, The Oprah Magazine), Alexandra Horowitz's follow-up to her New York Times bestseller explains how dogs experience the world through their most spectacular organ—the nose. In her "fascinating book...Horowitz combines the expertise of a scientist with an easy, lively writing style" (The New York Times Book Review) as she imagines what it is like to be a dog. Guided by her own dogs, Finnegan and Upton, Horowitz sets off on a quest through the cutting-edge science behind the olfactory abilities of the dog. In addition to speaking to cognitive researchers and smell experts, Horowitz visits detection-dog trainers and training centers; she meets researchers working with dogs to detect cancerous cells and anticipate epileptic seizure or diabetic shock; and she even attempts to smell-train her own nose. As we come to understand how rich, complex, and exciting the

world around us is to the canine nose, Horowitz changes our perspective on dogs forever. Readers will finish this book feeling that they have broken free of their human constraints and understanding smell as never before; that they have, for however fleetingly, been a dog. And, as The Boston Globe says about *Being a Dog*, "becoming more doglike, not surprisingly, can make anyone's life a little more vivid."

The Book of Dog Dec 20 2022 It's the night of the Yellow Puff-Ball Mushroom Cloud and a mysterious yellow fog is making its way across America, sowing chaos in its path. Mt. Fuji has erupted. The Euphrates has run dry. The White House is under attack by giant bears, the President is missing, and the Vice President

has turned into a Bichon Frisé. It's Apocalypse Time, my friends. Soon the Beast will rise. And six unlikely women will make the perilous journey to the Pit of Nethalem, where they will stop the Beast from fulfilling his evil purpose, or die trying. *The Book of Dog* is a satire of startling originality: a tale of politics, religion, demon possession, motherhood, love, betrayal, and easygoing bestiality. A ridiculously plausible story set in a near-future America, it wryly explores how even the most insignificant and powerless of people, when working together, can change the world for the better.

Puppies and Their Care Nov 07

2021 Excerpt from *Puppies and Their Care* Owning a dog is a serious responsibility. To enjoy the position of dog's master incurs obligation. The dog surrenders many of his natural rights and habits in return for the servitude he gives the human. The puppy is the perfect example of trusting loyalty. To him all the world's a stranger to be greeted. Not only each day but each moment of each hour of the day, he discovers something new in our world of humans, in which he must live. Life is an endless chain experience of play, discovery and thrills. Not a care worries his carefree soul. What scene on this earth holds more pure happiness than that of a litter of playing puppies-brothers and sisters in a family world that has not yet known separation! Consequently, a puppy, particularly if it is brot into a new home, should receive every consideration in the way of feeding, care, housing and training. At three months of age, it compares with the infant just out of the cradle; and to a great extent the same care which the child receives, should be given to the

puppy. Need of Common Sense One should not hesitate to buy a puppy because of the fear that it cannot be cared for properly. The dog has an immense amount of reserve stamina which keeps it in health and activity, notwithstanding all the wrong administrations and lack of care the human master may be guilty of. Bring the puppy into the home as a member of your household, use common sense, and in nine cases of ten, he will grow up into a normal, strong, creditable specimen of the canine family. Written for Two Classes. This booklet, *Puppies and Their Care*, is written for two general groups. First, to some extent for the dog breeder. He has had much experience in weaning and raising puppies; nevertheless, some of the suggestions here may be helpful to him. The second class easily is much larger in number because it embraces all those persons who are dog owners and lovers of dogs they who want a dog for the protection of the home, for a play companion for the child, as a watchdog or for other useful purposes-they who comprise the sales field for the kennel owner and dog breeder. And their number in the United State? is easily twelve million, or one out of every eleven persons in this country is a dog owner. Should not Own a Dog. National Dog Week carries the slogan, "Every dog needs a good home." There is a complement to this slogan- "Every good home should have a dog." Those persons who do not care for a dog properly, who do not keep the dog on

their premises, do not develop the mental ability of the dog thru training, who disregard the rights of neighbors, permit the dog to roam about and who do not properly groom and care for the dog—such persons are not worthy of owning dogs. They are the persons who make necessary the dog pound and the dog catcher. They are the ones who, instead of the dogs, should be thrown into the dog catchers wagon and taken to the dog pound. A Dog for Life Sep 17 2022
This is the true story of the journey of John Hawkins and his dog, Mouse, from way up north to way down south. Mouse has been John and his brother Tom's dog for life. They got her as a puppy when they were just little themselves, and they very quickly discovered that they could understand everything Mouse said and she could do the same. She was just a person like everyone else—though maybe a bit cleverer than most. You've maybe heard that John "ran away with his pet dog." But the truth about this story is that John and Mouse made the journey to save Tom. It's hard to pinpoint when Tom became truly ill, but when the doctors said they had to send Mouse away for fear of infection, the boys knew they had to do something. Without Mouse, Tom would never recover. The journey began to find a temporary home for Mouse, but once they'd set off, nothing turned out the way they'd planned.

In a Dog's Heart Jul 23 2020
What our dogs need to live a good life, and why we must come through for them Over the two decades she has spent raising and training service dogs for people with disabilities, Jennifer Arnold has come to a unique and profound understanding of the human-dog bond. Though it may seem simple and instinctive, the friendship and devotion we share with our pets is a wondrous evolutionary development. Our two species have come to rely on each

other for protection, companionship, comfort, and happiness—needs and benefits that go both ways. Yet when we step outside our designated roles and take on practices that require us to display dominance over our canine charges, we misread cues and misinterpret behavior, sometimes with disastrous results. Conversely, when communication between dog and keeper is clear and based on kindness and a willingness to see things through a dog's eyes, the payoff for both dog and owner is tremendous. When respect and care are brought together, we come to know the inalienable goodness in a dog's soul. As the founder of Canine Assistants, Arnold has implemented and advanced a methodology—Choice Teaching—that pairs scientific and behavioral knowledge about dogs with gentle incentive and encouragement to extraordinary effect. But she does not consider herself a dog trainer; rather, she sees herself as a relationship expert who improves the connection between humans and dogs and in the process better the quality of life for both. In *A Dog's Heart* offers Arnold's offers her best practices and useful tips that range over a dog's whole life, including:

- how to choose the puppy that's destined for you from a bustling litter and what you need to have on hand before you bring that puppy home;
- what to stock in your doggie first-aid kit;
- how to keep your pet safe from dangers at home and in the outside world;
- the challenges and rewards of

adopting an older dog; • how to help your dog overcome anxious behavior, from separation anxiety to thunderstorm phobia; • when to recognize that it's time to let go. As in her bestselling first book, *Through a Dog's Eyes*, Arnold illustrates what she's learned through captivating and moving stories drawn from her experience. We learn about Grace, a black Lab who was rescued after she was thrown from a truck and delivered to Canine Assistants emaciated, dehydrated, and with a broken pelvis. As Grace recovered she displayed an usual gift for scent detection and now spends her days sniffing out bombs on the Israeli border. We meet Casper, a Lab-golden mix who works full-time at Scottish Rite Children's Hospital in Atlanta, a best friend to kids undergoing cancer treatment, and a buddy ready to offer comfort as needed to the doctors on staff. We also discover the myriad ways in which dogs improve our lives—and what they need and deserve from us in return. [What Is a Dog?](#) Jul 15 2022 "An informative, well-written book on the evolution of all canids, including the wild types (wolves, coyotes, jackals, and dingoes)...Recommended."—Choice Of the world's dogs, fewer than two hundred million are pets, living with humans who provide food, shelter, squeaky toys, and fashionable sweaters. But roaming the planet are four times as many dogs who are their own masters—neighborhood dogs, dump dogs, mountain dogs. They are dogs, not companions,

and these dogs, like pigeons or squirrels, are highly adapted scavengers who have evolved to fit particular niches in the vicinity of humans. This book presents an eye-opening analysis of the evolution and adaptations of these unleashed dogs and what they can reveal about the species as a whole. Exploring the natural history of these animals, canine behavior experts Raymond and Lorna Coppingers explain how the village dogs of Vietnam, India, Africa, and Mexico are strikingly similar. These feral dogs, argue the Coppingers, are in fact the truly archetypal dogs, nearly uniform in size and shape and incredibly self-sufficient. Drawing on nearly five decades of research, they show how dogs actually domesticated themselves in order to become such efficient scavengers of human refuse. The Coppingers also examine the behavioral characteristics that enable dogs to live successfully and to reproduce, unconstrained by humans, in environments that we ordinarily do not think of as dog friendly. A fascinating exploration of what it actually means, genetically and behaviorally, to be a dog, *What Is a Dog?* is likely to change the way beagle or bulldog owners reflect on their four-legged friends.

[What's a Dog For?](#) Feb 22 2023 As dogs take their place as coddled family members and their numbers balloon to over 77 million in the United States alone, it's no surprise that canine culture is undergoing a massive transformation. Now subject to many of the same

questions of rights and ethics as people, the politics of dogs are more tumultuous and public than ever—with fierce moral battles raging over kill shelters, puppy mills, and breed standards. Incorporating interviews and research from scientists, activists, breeders, and trainers, *What's a Dog For?* investigates how dogs have reached this exalted status, and why they hold such fascination for us humans. **For the Love of a Dog** Aug 04 2021 Yes, humans and canines are different species, but current research provides fascinating, irrefutable evidence that what we share with our dogs is greater than how we vary. As behaviorist and zoologist Dr. Patricia McConnell tells us in this remarkable new book about emotions in dogs and in people, more and more scientists accept the premise that dogs have rich emotional lives, exhibiting a wide range of feelings including fear, anger, surprise, sadness, and love. In *For the Love of a Dog*, McConnell suggests that one of the reasons we love dogs so much is that they express emotions in ways similar to humans. After all, who can communicate joy better than a puppy? But not all emotional expressions are obvious, and McConnell teaches both beginning dog owners and experienced dog lovers how to read the more subtle expressions hidden behind fuzzy faces and floppy ears. For those of us who deeply cherish our dogs but are sometimes baffled by their behavior, *For the Love of a Dog* will come as

a revelation—a treasure trove of useful facts, informed speculation, and intriguing accounts of man's best friend at his worst and at his very best. Readers will discover how fear, anger, and happiness underlie the lives of both people and dogs and, most important, how understanding emotion in both species can improve the relationship between them. Thus McConnell introduces us to the possibility of a richer, more rewarding relationship with our dogs. While we may never be absolutely certain what our dogs are feeling, with the help of this riveting book we can understand more than we ever thought possible. Those who consider their dogs part of the family will find *For the Love of a Dog* engaging, enlightening, and utterly engrossing.

And a Dog Called Fig Jun 21 2020 *And a Dog Called Fig* is the story of one writer's life with dogs (including a frisky new puppy), how they are uniquely ideal companions for building a creative life, and some delightful tales about dogs and their famous writers Into my writer's isolation will come a dog, to sit beside my chair or to lie on the couch while I work, to force me outside for a walk, and suddenly, although still lonely, this writer will have a companion. An artist's solitude is a sacred space, one to be guarded from the chaos of the world, where the sparks of inspiration can be kindled into fires of creation. But within this quiet also lie loneliness, self-doubt, the danger of collapsing too far inward. An artist needs a familiar, a companion with emotional intelligence, innate curiosity, an enthusiasm for the world beyond, but also the capacity to rest contentedly for

many hours. What an artist needs, Helen Humphreys would say, is a dog. And *a Dog Called Fig* is a memoir of the writing life told through the dogs Humphreys has lived with and loved over a lifetime, including Fig, her new Vizsla puppy. Interspersed are stories of other writers and their own irreplaceable companions: Virginia Woolf and Grizzle, Gertrude Stein and Basket, Thomas Hardy and Wessex—who walked the dining table at dinner parties, taking whatever he liked—and many more. A love song to the dogs who come into our lives and all that they bring—sorrow, mayhem, reflection, joy—this is a book about steadfast friendship and loss, creativity and craft, and the restorative powers of nature. Every work of art is different; so too is every dog, with distinctive needs and lessons. And if we let them guide us, they will show us many worlds we would otherwise miss. Dog Sep 24 2020 Dogs are perhaps our most popular pets, and certainly one of the best-loved of all animals. They are not only humanity's best friend, they are also its oldest: burial sites dating back 12,000 years indicate that dogs moved alongside prehistoric peoples before, during and after both species settled the world. The story of the canine has been fundamentally entwined with that of humanity since the earliest times, and this ancient and fascinating story is told in Susan McHugh's *Dog*. This book unravels the debate about whether dogs are descended from wolves, and moves on to deal with canines in mythology, religion and health, dog cults in ancient and medieval civilizations as disparate as Alaska, Greece, Peru and Persia, and traces correspondences between the histories of dogs in the Far East, Europe, Africa and the Americas. *Dog* also examines the relatively recent phenomenon of dog breeding and the invention of species, as well as the canine's role in science fact and fiction; from Laika, the first astronaut, and Pavlov's famous conditioned dogs, through to science fiction novels and cult films such as *A Boy and his Dog*. Susan McHugh shows how dogs today contribute to human lives in a huge number of ways, not only as pets and guide dogs but also as sources of food in Asia, entertainment workers, and scientific and religious objects. *Dog* reveals how we have shaped these animals over the

millennia, and in turn, how dogs have shaped us.

In late adolescence, Pransky was bored: she needed a job. and so Sue Halpern decided to give herself and her underoccupied Labradoodle a new leash—er, lease—on life by getting the two of them certified as a therapy-dog team. Pransky proved to be not only a terrific therapist, smart and instinctively compassionate, but an unerring moral compass as well. In the unlikely-sounding arena of a public nursing home, she led her teammate into a series of encounters with the residents that revealed depths of warmth, humor, and insight Halpern hadn't expected. Little by little, their adventures expanded and illuminated Halpern's sense of what goodness is and does—how acts of kindness transform the giver as well as the given-to. Funny, moving, and profound, *A Dog Walks into a Nursing Home* is the story of how one virtuous—that is to say, faithful, charitable, loving, and sometimes prudent—mutt showed great hope, fortitude, and restraint (the occasional

begged or stolen treat notwithstanding) as she taught a well-meaning woman the essence and pleasures of the good life.

What Is a Dog? Dec 08 2021 On the heels of her family's beloved dog's death, one woman returns to the canines of her past in order to imagine the human she hopes to become in the future in her memoir, *What Is a Dog?* Chloe Shaw is in a dog house of her own choosing. A married mother with kids, the death of Booker, her children's eldest family pet, has left her reeling and reckoning with her lifelong relationship with dogs. Unable to shake the feeling a year later, she asks her family for some time alone to be with nothing but her thoughts and remaining canines, Safari and Otter—only to find the dogs of her past pawing at her every memory and running, sticks in mouths, back into her life. What follows is a meditation on one woman's life through the dogs she's loved and lost. Since she was a child, Shaw had learned to escape the hardest parts of being human by immersing herself in the lives of her canine companions, an adaptive attachment that carried her to adulthood. Yet, in marriage and motherhood, Shaw finds herself facing her most human struggles yet. Her old ways of "being the dog" in the face of hardship prove destructive, and it's not until she's able to love herself and learn from the dogs of her past and present that can she truly thrive as a person, and show up for the family who needs her to be their person. With artful

prose and a philosophical touch, Shaw takes us on an emotional journey anyone who has ever loved and lost a dog will connect with—and discovers dogs do more than just make our lives better—they quietly (and sometimes loudly) pull us boldly toward the person we were always meant to be.

A Dog's World Jan 29 2021

From two of the world's leading authorities on dogs, an imaginative journey into a future of dogs without people. What would happen to dogs if humans simply disappeared? Would dogs be able to survive on their own without us? *A Dog's World* imagines a posthuman future for dogs, revealing how dogs would survive—and possibly even thrive—and explaining how this new and revolutionary perspective can guide how we interact with dogs now. Drawing on biology, ecology, and the latest findings on the lives and behavior of dogs and their wild relatives, Jessica Pierce and Marc Bekoff—two of today's most innovative thinkers about dogs—explore who dogs might become without direct human intervention into breeding, arranged playdates at the dog park, regular feedings, and veterinary care. Pierce and Bekoff show how dogs are

quick learners who are highly adaptable and opportunistic, and they offer compelling evidence that dogs already do survive on their own—and could do so in a world without us. Challenging the notion that dogs would be helpless without their human counterparts, *A Dog's World* enables us to understand these independent and remarkably intelligent animals on their own terms.

Wynne's Dog Is Love May 21

2020 Please note: This is a companion version & not the original book. *Sample Book Insights:* #1 I had been studying dogs for several years before I finally decided to get one. I had been spending so much time with people and their dogs that I felt strange coming home to a dogless house. My family decided to get a dog, and they found one at a shelter that I wasn't familiar with. #2 The author went to visit the shelter with his family, and found that the dogs there were not welcoming at all. They exhibited behaviors that seemed the opposite of welcoming, and the author didn't feel safe conducting research there. #3 I had lived with dogs before, and I knew how warm their response to my species could be. Yet when I brought Xephos home, her affectionate nature did not make sense to me at first. It was not until I began to question other aspects of the received wisdom about dogs that I realized how special they are. #4 Hare was interested in the social intelligence of chimpanzees, and he tested them to see if they could understand the implications of

a simple pointing gesture. The chimpanzees failed, but his dog Oreo could understand the

gesture and find the food hidden under the cups.
