6"x9" Matte Finish Cover for an elegant look and feel □ Buy Now □ "Advances in technology, research, and evidence-based practice have led to improvements in the care of patients receiving radiation therapy. The knowledge and expertise required by nurses must focus on the needs of patients who come into their care at any point across the trajectory of the cancer journey. Nurses may work with patients at varying stages of the radiation therapy process and in a wide range of settings. Regardless, however, the need to be knowledgeable about the symptoms and side effects associated with this treatment is essential for nurses caring for this patient population. The Oncology Nursing Society has published the fifth edition of Manual for Radiation Oncology Nursing Practice and Education to support nurses who care for patients who will receive, are receiving, or have received radiation therapy. The fifth edition features significant updates and changes to the content to reflect advances in technology, treatment options, and symptom management. New sections have been added based on input from radiation oncology nurses or as a result of changes in treatment options, the needs of specific patient populations, and observations from clinical practice. New topics include patients with cognitive changes and dementia; general distress and coping; patients with mental illness; special populations, such as women who are pregnant, adolescents, and young adults; special needs related to late effects of treatment and cardiac toxicities; and treatment modalities, including cobalt therapy and immunotherapy. This manual serves as an essential resource for individual nurses new to working in a radiation therapy setting as well as to nurses wanting to advance their knowledge in radiation biology and protection, diverse radiation therapy modalities, combination treatments, site- or disease-specific concerns, symptom management, special populations, and care during transition points. Additionally, this manual can be a resource to advanced practice clinicians, educators, and administrators, with a focus on support for nursing staff seeking the education and skills required to care for patients receiving radiation therapy and their families"-- Over the past ten years there has been a dramatic increase in new nursing roles and nurse-led clinics within oncology. This unique handbook is a comprehensive companion for nurses studying and practising at an advanced level in this emerging field. This text outlines and discusses roles, responsibilities and skills related to advanced practice in oncology nursing - including leadership, communication skills and prescribing - linking throughout to the implications for clinical practice. It then provides a step-by-step guide to setting up and developing nurse-led clinics, looking in more detail at clinics focusing on surgery, chemotherapy, radiotherapy, clinical trials and follow ups, and providing an in-depth case example of a clinic set up for adjuvant Herceptin use. Practical, relevant and underpinned by current legislation, *Advanced Nursing Practice and Nurse-led Clinics*

in Oncology is an invaluable resource for oncology nurses. Journal Notebook To Write In. Lined, Ruled Journal 6in x 9in 100 lined Pages Get yourself a journal to write in. Journal your thoughts, notes, and much more. Get A Journal Today! This Nursing Journal / Notebook makes the IDEAL gift for that nurse or future nurse in your life. This Nurse notebook features 110 blank pages and is 6 x 9 inches in size. This book presents the current state of the nursing science in topics relevant to the care of pediatric oncology patients and their families across the treatment trajectory and is framed within a precision health framework. The spectrum of topics covered is wide, including, for example, symptom management, self-care management, exercise and physical activity, family-centered care, palliative care, the role of the nurse in treatment decision making, patient and nurse resiliency, survivorship, and genetic counseling. Throughout, there is a focus on the implications of research for nursing practice, highlighting which elements of the available evidence are ready for translation into practice and which are not. In addition, careful attention is paid to the role that nursing can play in further advancing science through clinical research. The authors are leading experts from across the globe. The book will be of special interest for pediatric oncology nurses, including direct care nurses, research nurses, and nursing leaders, and will also be a stimulating source for researchers and non-oncology nurses. Get a skill up in nursing with one of these visualization journals that make goal setting and tracking aspirations easy! Features: Monthly Goal Setting Goal Progress Tracking Lined Pages Vision Board Pages Product Description: 100 pages: Goal planning pages and college ruled pages 6x9 Matte cover Made in the country where ordered "This comprehensive clinical handbook for nurses in pediatric haematology/oncology, authored by nurse experts from the United Kingdom and North America, contains in-depth information regarding pathophysiology, diagnosis, treatment, advanced assessment, and interventions. It is organized in a user-friendly format with quick reference guides for the nurse. Given the ongoing, challenging developments faced during the clinical nursing care of children with cancer, this handbook will provide an indispensable tool for those working in this speciality."--Jacket. This Nursing Journal / Notebook makes the IDEAL gift for that future nurse in your life. This Nurse notebook features 110 blank pages and is 6 x 9 inches in size. OUR NURSING CATEGORIES FOR MEN & WOMEN BY CLICKING "AWESOME NURSE PRESS* UNDER THE TITLE*** Here's the Perfect Appreciation Gift Idea for Your Favorite Nurse, whether it's for his birthday, holiday, National Nurses Week or just because. It's features his nursing specialty and his unique specialness. Inside is filled with cute lined pages for his thoughts and musings. The 6x9-inch size tucks nicely into purses, totes and backpacks so it's always ready for his to write in. This comprehensive textbook for oncology nurses is organized into two parts. Part I contains information on the major principles of cancer treatment (i.e., epidemiology, pathophysiology, oncologic emergencies, etc.). In Part II issues related to specific cancers (i.e., breast, rectal, pancreatic, etc.) are discussed. This book is intended as a reference for oncology nurses. The field of oncology nursing has changed greatly in the last five years. Oncology nurses need a current, comprehensive text so that they can understand a patient's trajectory, provide appropriate interventions, and teach patients and their family members how to manage symptoms and cope with their diseases. I agree with the authors that the scope and practice of oncology nursing has been expanding beyond the hospital setting. Oncology nurses are found in the outpatient as well as the home care settings. A comprehensive reference is needed in order to be able to keep abreast of this demanding and changing specialty. The book met the authors' objectives. Text chapters provide the reader with a thorough discussion of the issues. The special features found in the text on standards of patient care, patient teaching guides, and quality improvement tools are very helpful to the reader. According to the author, the book is written for oncology nurses and oncology nursing students. I agree with the authors' targeted audiences. This book is specifically written for nurses in order to help them gain an understanding of the disease process, medical management, nursing implications, and teaching needs of patients. Both of the authors of this text are credible authorities on the subject matter presented. Miaskowki has had a wide variety of oncology nursing experience and is currently professor and chair of the Department of Physiologic Nursing at UCSF. Buchsel is recognized as an expert in the nursing care of bone marrow and stem cell transplantation. She is currently a clinical instructor at the University of Washington School of Nursing Education and is an oncology nurse consultant. The principles of cancer and current treatment modalities are covered in this book. Trends in surgical, radiation, chemotherapy, and biotherapy are written about in detail. In addition nurses are able to review the clinical implications and nursing management of patients undergoing disease specific treatment. The information on patient home care needs and patient teaching guides is very helpful. All aspects of oncology nursing care are covered in this text (including psychosocial, cultural, and terminal care issues). Tables and diagrams are appropriate and useful. One shortcoming of the text of note is that all diagrams appear in black-and-white. This is a very useful and comprehensive reference for oncology nurses. Providing the reader with nursing standards of care and patient teaching information are additional valuable features of this book. This book is well written and

compares favorably with other books in the field such as Groenwald's "Cancer Nursing: Principles and Practice," 4th Edition (Jones and Bartlett, 1997). 83/100. Stacen Keating, RN, BSN(Mount Sinai Hospital and Medical Center) Copyright 2006 Doody Reviews. This textbook is the first to focus on comprehensive interdisciplinary care approaches aimed at enhancing the wellbeing of children with cancer and their families throughout the illness experience. Among the topics addressed are the epidemiology of pediatric cancer distress, including physical, emotional, social, and spiritual dimensions; the role of the interdisciplinary team; communication and advance care planning; symptom prevention and management; care at the end of life; family bereavement care; and approaches to ease clinician distress. The contributing authors are true experts and provide guidance based on the highest available level of evidence in the field. The book has not only an interdisciplinary but also an international perspective; it will appeal globally to all clinicians caring for children with cancer, including physicians, nurses, psychosocial clinicians, and chaplains, among others. This book brings together in one volume many important topics about death and dying, including the pathophysiology of death, the causes of death among cancer patients, the ethics of death, the legal aspects of death for the physician and for the patient and caregivers, the economics of death, the medical management of the dying patient, including pain and dyspnea, the prediction of death, and the spiritual management of the dying patient. It also discusses other medical and humanistic aspects of death and dying, such as the historical definition of death and various cultures' and religions' viewpoints on death and the afterlife. Everybody, including every patient with cancer, will die, and every physician will have to assist dying patients. Oncologists face this prospect more often than many physicians. And yet to date there has been no comprehensive textbook on Thanatology, the academic discipline studying death and dying, to assist oncologists in this difficult task. This book will help the physician to understand his or her own relationship with death and to communicate about death and dying with the patient and the patient's caregivers. "The use of venous access devices (VADs) is central to the care that nurses provide to patients with cancer. Oncology nurses must base their practice on evidence-based research when available, but a lack of evidence has been a professional challenge for decades. With limited research to guide practice, ongoing controversies remain regarding optimal device management. Since 1989, the Oncology Nursing Society (ONS) has provided guidelines to establish a foundation for access device management. With this new text, ONS has identified practice standards, developed from a synthesis of evidence, critical review, and analysis of aspects of access device management for which nursing is accountable. Access Device Standards of Practice for Oncology Nursing reviews the controversies in access device care, explores the range of devices currently available, details the advantages and disadvantages of each device to ensure optimal selection based on patient needs, and discusses the key legal ramifications concerning access devices and their management. With access device technology becoming more complex, this text is an

essential resource for nurses practicing in a wide range of settings to ensure safe, effective care of patients with VADs."--Publisher's description. For the author of this book, disease is not an "enemy" that strikes a "victim." Rather, health and disease comprise a unitary whole of individual and environment. Health as Expanding Consciousness is an inspiration to those seeking a full experience of personal health. This Nursing Journal / Notebook makes the IDEAL gift for that nurse or future nurse in your life. This Nurse notebook features 110 blank pages and is 6 x 9 inches in size. Nurse writing journal and diary for nurses is the best writing journal and notebook you can have to write all your activities and schedule for the day. Get this one today and make it your writing pad for every little thing. Chemotherapy and Immunotherapy Guidelines and Recommendations for Practice features 26 chapters examining multiple categories of cancer-care agents, including chemotherapy, immunotherapy, molecularly targeted agents, and hormone therapy. As many patients with cancer live longer due to rising rates of survivorship, psychosocial concerns and quality-of-life issues are taking on increasing importance in oncology nursing. Newly updated and revised, this second edition addresses common psychosocial issues that arise in daily nursing practice. Holland-Frei Cancer Medicine, Ninth Edition, offers a balanced view of the most current knowledge of cancer science and clinical oncology practice. This all-new edition is the consummate reference source for medical oncologists, radiation oncologists, internists, surgical oncologists, and others who treat cancer patients. A translational perspective throughout, integrating cancer biology with cancer management providing an in depth understanding of the disease An emphasis on multidisciplinary, research-driven patient care to improve outcomes and optimal use of all appropriate therapies Cutting-edge coverage of personalized cancer care, including molecular diagnostics and therapeutics Concise, readable, clinically relevant text with algorithms, guidelines and insight into the use of both conventional and novel drugs Includes free access to the Wiley Digital Edition providing search across the book, the full reference list with web links, illustrations and photographs, and post-publication updates ***SEE ALL OUR NURSING CATEGORIES FOR MEN & WOMEN BY CLICKING "AWESOME NURSE PRESS" UNDER THE TITLE***Here's the Perfect Appreciation Gift Idea for Your Favorite Nurse, whether that's for her birthday, holiday, National Nurses Week or just because. It's features her nursing specialty and her unique specialness. Inside is filled with cute lined pages for her thoughts and musings. Enough space to write down all your notes, important ideas and other important thoughts. Perfect as a Christmas gift for RN Nurse Retirement Gifts, RN's Future Oncology Nursing women Christmas Gifts and NP oncologist Nurse Student Appreciation Gifts or birthday Gift. Published in collaboration with the ONS, this text is the definitive source for concepts and practices in oncology nursing and can be used for orientation of nurses to oncology, inservice and continuing education programs for practicing nurses, a basis for curriculum development in graduate programs, and as a review tool for certification. Based on the blueprint of the certification examination by the ONCC (Oncology Nursing Certification Corporation), the book is in outline format to help readers focus on the most important information. Instructor resources available; contact your sales representative for details. Covers the entire scope of the specialty ensuring comprehensive coverage Outline format helps the reader focus on the most important information Effective guide for teaching and learning for in-service, continuing education, and academic programs Powerful study tool for the ONCC certification exam Tables and figures illustrate complex concepts * Entirely revised, updated, and expanded to reflect the current state of oncology nursing practice. * Expanded pain management content. * New content on nonpharmacologic interventions (e.g. heat massage, imagery). * New content on alternative therapies. Although surgery remains the mainstay of treatment for the patient diagnosed with a solid tumour, how a patient is cared for before and after surgery has undergone dramatic changes in recent years. Where once surgical patients with cancer were placed in specialized care centres staffed with specially trained and certified oncology nurses, surgical oncology patients are now often found on mixed units housing similar surgical patient populations and often in the care of nurses who are not specialized in oncology. In today's changing climate, oncology nurses work much more closely with a diverse team of healthcare professionals and having an intimate knowledge of the surgical oncology patient and treatment process has become even more important. Surgical Oncology Nursing provides you a detailed examination of surgical patients with cancer from diagnosis to survivorship. The care of the surgical patient with cancer involves a diverse healthcare team with many hands touching the patient at different stages, and the editors of this new book bring a varied set of backgrounds, from nurse navigation to advanced practice nursing. Chapters provide you with a full view of the process for a variety of patients with cancer. You'll gain details in areas such as diagnosis, preoperative and perioperative

care, nutritional care, surgical wounds and ostomy care, as well as survivorship issues. In addition, you'll gain insight into implications for pediatric and geriatric patients. You'll also get details on surgical procedures used on patients with cancer, including robotic minimally invasive surgery, interventional radiology, intraoperative radiation therapy, and reconstructive surgery. The core of the book focuses on the surgical care needed for patients with different types of tumours. Surgical Oncology Nursing reviews a variety of tumour types, from breast cancer to skin cancer, and details the specifics for the care of each patient population. In all, 11 types of cancers are reviewed, providing you the comprehensive information you need. Whether care is provided in a dedicated, oncology setting or within a diverse patient care environment, you'll need the type of knowledge found in Surgical Oncology Nursing to provide the best care possible for this unique patient population. This new title provides a strong state-of-the-art assessment for cancer nursing research. Oncology nurses and other healthcare professionals will also be able to utilize this text as a foundation for developing future research directions and to break down the science for dissemination and use in everyday practice. Advancing Oncology Nursing Sciencealso makes a significant contribution to the evidence-based-practice (EBP) agenda, synthesizing information on bodies of substantiated science that can be translated into clinical practice and health policy. Sections include foundations and priorities of oncology nursing science; advancing oncology nursing science; leading causes of cancer; current and emerging issues in oncology research; and research training and education. Also included is a section detailing selected resources for advancing oncology nursing science. From practitioners to nurse investigators, from faculty to graduate students, all manner of health professionals will want to add this title to their nursing library.
