Using stories to teach ICT is a new, excellent series of four books that will make the teaching of ICT a more exciting and creative cross-curricular experience. The aim of the series is for ICT to be presented in a format that shows how information technology is used in our everyday lives and demonstrates ways how ICT skills can be taught and extended while linking to a wide variety of other subject areas of the curriculum. Ages 7-9 contains: 6 fun and original stories, detailed lesson plans, up to 4 worksheets with each lesson, activities to develop a range of ICT skills. Over the past two decades in the West there has been a substantial re-appraisal of the Stalinist period. Social historians, in particular, have focused their attention on the social dynamics of Stalinism. This collection of essays is based on a conference held at the School of Slavonic & East European Studies, the University of London, on 'Stalin and Stalinism'. The contributors have analysed specific areas of the research available on Stalin and Stalinism in the USSR debate. Their work should be placed within the context of current scholarship in the field, both in the Former Soviet Union and the West. This groundbreaking text will be critical in stimulating interest in the subject and providing material for further debate. 20 REMOVABLE POSTERS

Whether your band is just starting out or touring the nation, here's how you can build its identity by making your own unique gig posters, custom T-shirts, album covers, record sleeves, and stickers. Fans want cool and creative band merchandise, and this book gives you the tools and information you need to create your own. Author Ruthann Godellei is an artist and printmaking professor at Macalester College in St. Paul, Minnesota, with vast experience making gig posters as well as teaching band members how to make their own. She explains, with step-by-step instructions and photos, techniques like screenprinting, photocopy art, mixed-media collage, stencil, stamping, and other guerilla art styles. Included as well is a gallery of art and artists to inspire you in creating your band's look with your merch. Why did collectors seek out posters and collect ephemera during the late-nineteenth and the twentieth centuries? How have such materials been integrated into institutional collections today? What inspired collectors to build significant holdings of works from cultures other than their own? And what are the issues facing curators and collectors of digital ephemera today? These are among the questions tackled in this volume—the first to examine the practices of collecting prints, posters, and ephemera during the modern and contemporary periods. A wide range of case studies feature collections of printed materials from the United States, Latin America, France, Germany, Great Britain, China, Japan, Russia, Iran, and Cuba. Fourteen essays and one roundtable discussion, all specially commissioned from art historians, curators, and collectors for this volume, explore key issues such as the roles of class, politics, and gender, and address historical contexts, social roles, value, and national and transnational aspects of collecting practices. The global scope highlights cross-cultural connections and contributes to a new understanding of the place of prints, posters and ephemera within an increasingly international art world. Canadians have seen Liberal governments. They've seen Conservative governments. And they've seen New Democrat governments. But as of 2019 they still have yet to see a Green government. Around the rest of the world, however, Green Parties have formed governments many times. In many countries they have been an established part of the political domain for decades. And they're not seen as a "single-issue party", as they're so often wrongly described in Canada. What Does Green Mean? is a world tour of Green parties and Green political ideas. Using international examples of Green parties from around the globe, it explores what the Greens are trying to do for politics and for the planet. From Green governments in Germany, Sweden, and Ireland, to the individuals who founded the Canadian Green movement, the book aims to leave the reader with a richer understanding of what Green truly means. Anthropology graduate students and newly minted professionals now have a one-stop source that demystifies the all-important task of getting their work published. How to Get Published in Anthropology provides tried-and-true advice from anthropologists who share their experiences and from publishing professionals on how to publish, where to publish, and what publishing efforts will be most effective for individual career paths. Negotiating the divide between "respectable manhood" and "rough manhood" this book explores masculinity at work and at play through provocative essays on labor unions, railroads, vocational training programs, and NASCAR racing. This book is a case study of the development of peace psychology in Australia. While there is, in comparison to other countries, relatively little overt violence, Australia the nation was founded on the dispossession of Indigenous people, and their oppression continues today. Peace Psychology in Australia covers the most significant issues of peace and conflict in the country. It begins with a review of conflict resolution practices among Australia's ancient Indigenous cultures and

succinctly captures topics of peace and conflict which the country has faced in the past 222 years since British settlement. The fast population growth, thriving multiculturalism, leadership in international affairs and environmental isolation make Australia a microcosm for the study of human conflicts and peace movements. Designing Science Presentations guides researchers and graduate students of virtually any discipline in the creation of compelling science communication. Most scientists never receive formal training in the creation, delivery, and evaluation of such material, yet it is essential for publishing in high-quality journals, soliciting funding, attracting lab personnel, and advancing a career. This clear, readable volume fills that gap and provides visually intensive guidance at every step—from the construction of original figures to the presentation and delivery of those figures in papers, slideshows, posters, and websites. It provides pragmatic advice on the preparation and delivery of exceptional scientific presentations; demonstrates hundreds of visually striking presentation techniques, giving readers inspiration for creating their own; and is structured so that readers can easily find answers to particular questions. Clear heading for each section indicates its message, highlighted with graphic illustrations Two summary paragraphs that complement the visual images and clearly discuss the main point Numerous examples of high-quality figures, page layouts, slides, posters, and web pages to help stimulate readers' ideas for their own presentations Numerous "before and after" examples to illustrate the contrast between poor and outstanding presentations A pioneering survey of leading and emerging global artists, curators and art practitioners on the question: can art aid in conflict resolution and therefore reduce global tensions and human suffering? Throughout the centuries, art has documented the atrocities of wars, participated in propaganda campaigns, and served as an advocate for peace and social justice around the world. The aim of this project is to explore how art can assist in creating dialogue and bridges across cultures and opposing groups. Over 100 leading and emerging architects, artists, curators, choreographers, composers, and directors of art institutions around the globe explore the potentially constructive role of the arts in conflict resolution. A summarizing chapter maps out the diverse positions and examines the variety of themes and approaches that were brought up. Essential reading for all undergraduate chemistry students, this engaging text has been carefully designed to help students make the challenging transition from school through to university, get the most out of their education, and ultimately use their degree to enhance their employability.
