Sanskrit Self Learner Sir M.Monier-Williams embarked upon Sanskrit-English Dictionary, with the primary object of exhibiting, by a lucid etymological arrangement, the structure of the Sanskrit language, the very key-stone of the science of Comparative Philology. Though all lexicographers have to rely on the work of their earlier compeers, Sir Williams` work is unique and original in its plan and execution, the utility of which is seen in its repeated reprints. This is not a mere aggregation of words and meanings but the fruit of a colossal industry and experience with the actual treatises in the original language on a number of subjects. All the words are arranged etymologically and philologically with special reference to cognate Indo-European languages. The author refers to several authors and extant works. the work includes well over 1,80,000 words. This invaluable thesaurus serves far too well the needs of researchers and lovers of Sanskrit. There is an elaborate and informative Introduction detailing the inception and progress of this huge task, successfully completed with the collaboration of devoted scholars like Prof. E. Excerpt from First Book of Sanskrit: Being an Elementary Treatise on Grammar, With Exercises Tur. Study of Sanskrit has but recently risen in the estimation of the educated natives of this

Presidency and of our Educational authorities. The old Sanskrit College of Poona owed its existence and continuance rather to the spirit of conciliation and tolerance in our rulers, than to their conviction of the utility of Sanskrit as a branch of general education. The modern critical and progressive spirit was not brought to bear upon it. The old Sanskritists were allowed to carry all things in their own way. After about thirty years since its establishment, the authorities began to exercise active interference, until at length the College was abolished, and a new system inaugurated, which to be complete and effective, requires, in my humble opinion, a partial restoration of the old institution.
