The first major reference work on this field, the Handbook of Anthropology in Business is a creative production of more than 60 international scholar-practitioners working in universities and corporate settings from high tech to health care. Offering broad coverage of theory and practice around the world, chapters demonstrate the vibrant tensions and innovation that emerge in intersections between anthropology and business and between corporate worlds and the lives of individual scholar-practitioners. Breaking from standard attempts to define scholarly fields as products of fixed consensus, the authors reveal an evolving mosaic of engagement and innovation, offering a paradigm for understanding anthropology in business for years to come. Between 1895 and 1904 a great wave of mergers swept through the manufacturing sector of the U.S. economy. The firm of Cammell Laird originated in a boiler works in 1824 before growing and diversifying to become one of a small number of companies worldwide which could build, armour and arm the largest warships from the operations of a single company group. After World War I, it was reconstructed as a naval and mercantile shipbuilder with important financial interests in steel and rolling stock manufacture. Booming activity in World War II and continuing prosperity until the late 1950s was followed by increasing competition and deepening problems. By the 1980s the firm’s remaining steel interests had failed; in 1993 the once great Birkenhead shipyard closed. How and why did the businesses grow, then experience such problems and eventually collapse? This book tries to find answers.
