Mazda MX-5 Miata 1.6 Enthusiast s

Workshop Manual Oct 07 2021 With open-topped styling and performance evocative of the classic sportscars of the 1960s, the Mazda MX-5/Eunos had to be a huge international success - and that's exactly what it's become. Now a familiar sight on the streets and boulevards of the world, the MX-5 is owned by real enthusiasts, the kind of people who will want to have hands-on involvement with the maintenance and repair of their prized possession. For those enthusiasts, here is what we believe to be the best, easiest to use workshop manual in the world. Author Rod Grainger set out to create a new kind of owner's workshop manual - friendly, easy to understand, easy to use, and yet more detailed than any other manual currently available: two years later, the Mazda MX-5 Miata 1.6 Enthusiast's Workshop Manual was the result. Rod, and fellow enthusiasts Pete and Judith, stripped down an MX-5 in an ordinary domestic garage using ordinary tools and, in the process, took over 1,500 step-by-step photographs. The result of all this work is a superbly detailed text which passes on to the reader every detail of important jobs, including how problems can be overcome without resorting to special tools. This manual even tells the reader the size of nuts and bolts so they can start work with the right tools and all clearances and torque values are given in the text as the reader needs them. At paragraph level, a unique symbol system provides cross-references or tells the reader that there are helpful associated photos, drawings and tables. The dreaded words "reassembly is a reversal of the dismantling procedure" are banned, and every task, from changing a bulb to rebuilding the gearbox, is described in full. Besides detailed coverage of maintenance and repairs, this manual includes advice on rustproofing, cosmetic tuning and mechanical tuning. Rod's manual was prepared with the assistance of Mazda, and it applies to all 1.6 litre models built between 1989 and 1995. Most of the manual is relevant to later 1.6 litre models, too.

Building a Special with Ant Anstead Master Mechanic Mar 20 2020 Ant Anstead's Building a

Special brings the Haynes story full circle, coming 61 years after the original Building a 750 Special was written by John Haynes, Haynes Publishing's founder, when he was still a schoolboy. This book is a TV tie-in, following the 12-part TV series *Ant Anstead Master Mechanic*, aired on Motor Trend, part of the Discover Network in the US and UK, following Ant Anstead's build of his own-design 'special' car, taking inspiration from the Alfa 158 - the first World Championship-winning F1 car, which raced from the 1930s until the 1950s. The 12-part TV series followed Ant's build of the car, from the first design ideas, through the construction, culminating in the debut of the car during the 2019 US Grand Prix weekend in Austin, Texas. The book follows Ant's personal build of the car, from the selection of the donor MG TD for the chassis, and Alfa Romeo Spider for the engine and gearbox, through modifying the chassis, building the suspension, steering, brakes, bodywork and interior, and putting all the components together to produce a finished one-off 'special.' Content includes: Introduction The history of specials Planning Donor car Chassis, suspension, steering, rear axle Engine, fuel system, cooling system, ancillaries, exhaust Gearbox Bodywork Braking system Cockpit Wiring Preparation and painting Testing Setting up and Making road legal.
