The School of Mathematics at Rome's University Campus Feb 10 2022

The School of Mathematics is a masterpiece of the early 1930s by Gio Ponti, who is today regarded as a master of Italian Modernism. Although World War II bombings shattered the coloured stained-glass window that once adorned the balanced and harmonious white travertine façade, the building remains a striking and significant piece of architecture. Although it underwent a series of transformations over the years before its historical and artistic relevance was recognised, it can still be appreciated and admired for its magnificent expressivity. Its uniqueness derives from its complexity, such as is often found in Italian monuments of all ages: a rare synthesis of urban design, architecture, art, industrial design, historical archives and – perhaps the first of its kind – scientific production in the field of mathematics. This illustrated report is a synopsis of the extensive technical research documents produced by the research team for each step of the work. It is also a premise for the conservation management plan proposed at the end of the full report. As in any area of science, knowledge is at the basis of future action: we need to understand today how to take care of the historical buildings of our campus tomorrow – buildings recognised worldwide as architectural and historical monuments.

Samuel Barber May 01 2021 An annotated reference guide to Barber's life, works and achievements, it will prove valuable for anyone seeking information on him.

The Tragedy of Empire Feb 22 2023 Michael Kulikowski traces two hundred years of Roman history during which the Empire became ungovernable and succumbed to turbulence and change. A sweeping political narrative, *The Tragedy of Empire* tells the story of the Western Roman Empire's downfall, even as the Eastern Empire remained politically strong and culturally vibrant.

Gonadal Dysgenesis—Advances in Research and Treatment: 2012 Edition Nov 26 2020 *Gonadal Dysgenesis—Advances in Research and Treatment: 2012 Edition* is a ScholarlyBrief™ that delivers timely, authoritative, comprehensive, and specialized information about Gonadal Dysgenesis in a concise format. The editors have built *Gonadal Dysgenesis—Advances in Research and Treatment: 2012 Edition* on the vast information databases of ScholarlyNews.™ You can expect the information about Gonadal Dysgenesis in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed,

and relevant. The content of *Gonadal Dysgenesis—Advances in Research and Treatment: 2012 Edition* has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

Contributions to Medical and Biological Research Feb 27 2021

Network Society Jul 15 2022 The present volume attempts to critically evaluate claims that modern society may be read and understood as a network. Accepting that this perspective holds some potential, the question becomes how to best capitalize on it. To analyze society as a network means to respond not only to the "actual needs", but also to highlight the "opportunities" and the "utilities", and to investigate whether society is increasingly relational or just perceived as such, as e.g. digital "social networks" and related concepts exemplify. From a strictly scientific perspective to answer the question "how to" read society as a network means to ask ourselves: a) if the conceptual categories (especially the concepts of structure and exchange) and the paradigms of traditional analysis (holism and individualism, both in the functionalist and the conflictive versions) are still sufficient; b) if new conceptual categories/theories/instruments are needed to represent more properly the reality we face: to investigate it, to explain it or, at least, to understand it. Starting from a reflection on already established social networks (Scott, 2003), the fundamental differences between groups and networks (Vergati, 2008), the logics of networks (Serra, 2003) as well as social capital formation and links (Di Nicola, 2006; Mutti, 1998), we seize the spatial dynamics, seemingly following opposite paths, but which revert to a common denominator: de-spatialization and re-spatialization, namely the processes of dematerialization of space(s) and its reconstruction by specific relational dynamics and forms. The study of networks is therefore not attributable to a single theory but to several theories converging towards a unique perspective (spaces) and logical reasoning (Serra, 2001) each one with its own uniqueness. The strength of this volume and the difference with respect to other attempts at explaining the Network Society lies in the multidimensional and interrelated perspectives it offers emerging from converging multidisciplinary perspectives (sociological, anthropological and linguistic), and from applications that the Network Society provides, namely,

international (European Governance), institutional, public (linguistic landscape of the city of Rome) and mediated ones (communication technology).

Thirty-five Years of Luther Research Dec 16 2019

Rome Sep 17 2022 "Formation is ideal and utopian thinking, whereas Transformation is the adaptation of the ideal to the real or existing conditions. Are the two mutually exclusive? Or do they exist in conversation, a constant back-and-forth, push-and-pull between the idealised and the pragmatic? This book examines the dialectical relation of Formation and Transformation in the creation of the city. Taking Rome as its central case study, it develops a contextual theory of urban development that incorporates Italian Renaissance, Baroque architecture, and classical history. Similarly, this book encourages the aspiring architectural student to consider the ramifications of practice and praxis. How can utopian thinking, and the actualised execution of that thinking, continue to operate in existing urban contexts? How can we relate the complexity of Roman urbanism to the role of Roman architecture in its urban context? This book manoeuvres through such difficult questions deftly, illuminating its points with a wide selection of colour images."--

Literary Digest: a Repository of Contemporaneous Thought and Research as Presented in the Periodical Literature of the World Jun 21 2020

The Limits to Growth Oct 18 2022 New York: Universe Books, [1972].
Family Firms into International Markets Nov 14 2019 This book offers an integrated discussion on international entry mode decisions in the context of family firms. It provides scholars and students a state-of-the-art of extant knowledge on family firms' entry modes into foreign contexts by outlining main research trajectories and empirical findings of prior studies. To this end, differences between family and non-family firms as well as sources of heterogeneity across different family firms are pointed out for the main types of entry modes. Moreover, this book offers new insights on the choice between either creating a joint venture or a wholly-owned subsidiary in a foreign country as it theoretically and empirically shows how economic and noneconomic drivers shape family leaders' international strategic preferences. Offering a thoughtful review of extant studies and a comprehensive reasoning on the phenomenon of family firm internationalization, this is an insightful read for scholars and students interested in family firms and international business.

Metadata and Semantic Research Jun 02 2021 This book constitutes the thoroughly refereed proceedings of the 13th International Conference on Metadata and Semantic Research, MTSR 2019, held in Rome, Italy, in October 2019. The 27 full and 15 short papers presented were carefully

reviewed and selected from 96 submissions. The papers are organized in the following tracks: metadata and semantics for digital libraries, information retrieval, big, linked, social and open data; metadata and semantics for agriculture, food, and environment; digital humanities and digital curation; cultural collections and applications; european and national projects; metadata, identifiers and semantics in decentralized applications, blockchains and P2P systems.

Roman History: Early to Republic: Oxford Bibliographies Online Research Guide Dec 28 2020 This ebook is a selective guide designed to help scholars and students of the ancient world find reliable sources of information by directing them to the best available scholarly materials in whatever form or format they appear from books, chapters, and journal articles to online archives, electronic data sets, and blogs. Written by a leading international authority on the subject, the ebook provides bibliographic information supported by direct recommendations about which sources to consult and editorial commentary to make it clear how the cited sources are interrelated. A reader will discover, for instance, the most reliable introductions and overviews to the topic, and the most important publications on various areas of scholarly interest within this topic. In classics, as in other disciplines, researchers at all levels are drowning in potentially useful scholarly information, and this guide has been created as a tool for cutting through that material to find the exact source you need. This ebook is just one of many articles from Oxford Bibliographies Online: Classics, a continuously updated and growing online resource designed to provide authoritative guidance through the scholarship and other materials relevant to the study of classics. Oxford Bibliographies Online covers most subject disciplines within the social science and humanities, for more information visit www.aboutobo.com.

[The Triumph of Empire](#) Jul 23 2020 Michael Kulikowski takes readers into the political heart of imperial Rome, beginning with the reign of Hadrian, who visited the farthest reaches of his domain and created stable frontiers, to the decades after Constantine the Great, who overhauled the government, introduced a new state religion, and founded a second Rome.

Topography of Rome: Oxford Bibliographies Online Research Guide Jan 21 2023 This ebook is a selective guide designed to help scholars and students of the ancient world find reliable sources of information by directing them to the best available scholarly materials in whatever form or format they

appear from books, chapters, and journal articles to online archives, electronic data sets, and blogs. The Changing Landscapes of Rome's Northern Hinterland Feb 16 2020 This study presents a new regional history of the middle Tiber valley as a lens through which to view the emergence and transformation of the city of Rome from 1000 BC to AD 1000. Setting the ancient city within the context of its immediate territory, the authors reveal the diverse and enduring links between the metropolis and its hinterland.

Are We Rome? Aug 16 2022 What went wrong in imperial Rome, and how we can avoid it: "If you want to understand where America stands in the world today, read this." —Thomas E. Ricks The rise and fall of ancient Rome has been on American minds since the beginning of our republic. Depending on who's doing the talking, the history of Rome serves as either a triumphal call to action—or a dire warning of imminent collapse. In this "provocative and lively" book, Cullen Murphy points out that today we focus less on the Roman Republic than on the empire that took its place, and reveals a wide array of similarities between the two societies (The New York Times).

Looking at the blinkered, insular culture of our capitals; the debilitating effect of bribery in public life; the paradoxical issue of borders; and the weakening of the body politic through various forms of privatization, Murphy

persuasively argues that we most resemble Rome in the burgeoning corruption of our government and in our arrogant ignorance of the world outside—two things that must be changed if we are to avoid Rome’s fate. “Are We Rome? is just about a perfect book. . . . I wish every politician would spend an evening with this book.” —James Fallows

Research in Progress Nov 07 2021

Jesus Research May 13 2022 This volume explores nearly every facet of Jesus research -- from eyewitness criteria to the reliability of memory, from archaeology to psychobiography, from oral traditions to literary sources, and from narrative criticism to Gospel criticism. Bringing together a wide variety of topics and perspectives in one volume, this ambitious collaborative enterprise casts light on important debates and encourages creative links between ideas new and old. This distinguished collection of articles by internationally renowned Jewish and Christian scholars originates with the Princeton-Prague Symposium on Jesus Research. It summarizes the significant advances in understanding Jesus that scholars have made in recent years, chiefly through the development of diverse methodologies. Even readers who are already knowledgeable in the field will discover unique angles from well-known New Testament scholars, and all will be brought up to speed on the current state-of-play within Jesus studies.

Interdisciplinary Research for the Proposal of the Urban Biosphere Reserve of Rome Municipality Nov 19 2022

Prostaglandins in Cancer Research Dec 08 2021 Arachidonic acid metabolites are known to play a regulatory role in a number of biological systems, in which they function as microenvironmental hormones and intracellular signal mediators. One of the most exciting areas of research of these compounds is the one that studies the relationship between prostaglandins and tumor cell growth and function. In the last few years there has been an extraordinary evolution of data on prostaglandins (and related compounds) and cancer. This volume is based on papers presented at the 1986 International Conference on Prostaglandins and Cancer organized by the Italian National Research Council and the II University of Rome, and held in Rome, Italy, in June, 1986. This Conference brought together oncologists and specialists in the areas of prostaglandin chemistry, biochemistry, pharmacology, physiology, cellular and molecular biology to overview the actual state of knowledge on the role of eicosanoids in cancer and to focus on the key questions that need to be answered. The picture that comes out of this book describes a very complicated network of interactions

between arachidonic acid metabolites and different aspects of the complex phenomenon "cancer". Eicosanoids participate in carcinogenesis initiation and promotion, and their relationship with tumor promoters and growth factors is well established. During cancer growth, different prostaglandins can have different roles in the regulation of cell proliferation and differentiation and in metastasis formation; meanwhile evidence is accumulating for a possible use of some of these compounds as antineoplastic agents.

Non-Alcoholic Fatty Liver Disease Research 2016 Jan 09 2022 This book is a printed edition of the Special Issue "Non-Alcoholic Fatty Liver Disease Research 2016" that was published in IJMS
