The changes, redundancies and so on, that often follow this news, are a further source of turmoil for the employees of both companies involved. There is no magic

formula to avoid these effects completely. However, good planning, communication and human resource practice can mitigate the worst of them; keep everyone that matters on board; and ensure that the new organization maintains your reputation for sensitive people management. Get it wrong, on the other hand, and you may lose the very people you were most anxious to keep; put the success of the process at risk and even face employment tribunals or other legal proceedings. In addition, imagine how these processes are complicated by any transnational elements. James F. Klein and Robert-Charles Kahn provide a practical, hands-on guide to successfully integrating HR functions following any merger or acquisition within Europe. The book guides you step by step, providing the methodology, tools, sequence of events and necessary material. It includes comparative tables, tips and stories illustrating the differences, specific issues and pitfalls that are particular to the different European countries. 20 years of human resources experience across companies in continental Europe has gone into creating this blueprint to successfully implementing the people side of successful mergers and acquisitions. This book contains the presentations given at the Workshop on OpenMP Applications and Tools, WOMPAT 2001. The workshop was held on July 30 and 31, 2001 at Purdue University, West Lafayette, Indiana, USA. It brought together designers, users, and researchers of the OpenMP application programming interface. OpenMP has emerged as the standard for shared memory parallel programming. For the first time, it is possible to write parallel programs that are portable across the majority of shared memory parallel computers. WOMPAT 2001 served as a forum for all those interested in OpenMP and allowed them to meet, share ideas and experiences, and discuss the latest developments of OpenMP and its applications. WOMPAT 2001 was co-sponsored by the

OpenMP Architecture Review Board (ARB). It followed a series of workshops on OpenMP, including WOMPAT 2000, EWOMP 2000, and WOMPEI 2000. For WOMPAT 2001, we solicited papers formally and published them in the form of this book. The authors submitted extended abstracts, which were reviewed by the program committee. All submitted papers were accepted. The authors were asked to prepare a final paper in which they addressed the reviewers' comments. The proceedings, in the form of this book, were created in time to be available at the workshop. In this way, we hope to have brought out a timely report of ongoing OpenMP-related research and development efforts as well as ideas for future improvements.
