Pablo Picasso May 23 2020 Exactly when Matisse and Picasso first met is open to debate. Their earliest encounter may have taken place during the Matisse retrospective at Galerie Druet right before the 1906 Salon des Indépendants. The latter marked the first time all the Fauves exhibited together. The centerpiece was Matisse's monumental *Le bonheur de vivre*. Leo Stein bought the painting while the Salon was still running, regarding it as "the most important work of our time." This opinion undoubtedly annoyed Picasso. Jealousy of the other man's success goaded him to greater innovations. In his view, the new art would have to match the sense of endless discovery that science and technology were offering. The 1900 "Exposition Universelle" had already shown the latest marvels in engineering. If painting wanted to keep the public's attention, instead of merely reproducing what the eye saw, it had to generate its own reality on the surface of the canvas, a reality more vivid than, and bearing only the most cursory resemblance to, anything found in nature. Matisse was also a catalyst in that he was the one who introduced Picasso to African sculptures. Max Jacob recalls: "Matisse took a black, wooden statuette from a table and showed it to Picasso. It was the first piece of Negro wooden art. Picasso held onto it all evening. The next morning, when I arrived at the studio, the floor was strewn with sheets of paper, and on each sheet was drawn the head of a woman; all of them were more or less the same: one eye, an oversized nose attached to the mouth, and a lock of hair on the shoulders. Cubism was thus born" (cited in Janine Warnod, *Washboat Days* [New York: Grossman Publishers Warnod, 1972, p. 128]).

The Federalist Papers Oct 28 2020 Classic Books Library presents this brand new edition of “The Federalist Papers”, a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. “The Federalist”, as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755–1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation’s finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.
