International Commercial Arbitration in the European Union

May 14 2022 This illuminating book contributes to knowledge on the impact of Brexit on international commercial arbitration in the EU. Entering the fray at a critical watershed in the EU's history, Chukwudi Ojiegbe turns to the interaction of court litigation and international commercial arbitration, offering crucial insights into the future of EU law in these fields.

Arbitration Act 1996 Jun 03 2021 This book is an essential resource for any legal practitioner involved in any aspect of English arbitration law. It provides a thorough annotation of the Arbitration Act 1996, and contains comprehensive explanations of developments in the relevant case law to each section of the Act. Since the fourth edition of this book, the English courts have decided many important new cases on virtually every aspect of arbitration law. The most important developments relate to: The growth of anti-arbitration injunctions; The use of freezing injunctions against third party assets and the availability of anti-suit injunctions in EU proceedings; The definition of seat, the appointment of arbitrators, choice of applicable law,

jurisdiction, the form of the award and the slip rule; Enforcement of foreign awards, and challenges to domestic awards by way of jurisdictional attacks, serious irregularity or error of law In this 5th edition, the notes to each section contain helpful sub-headings and a new Appendix will contain a fully annotated version of CPR Part 62 and the Practice Direction. The book will also be useful for academics and university students of law at all levels seeking an understanding of the 1996 Act, including those on the Legal Practice Course.

Education System in Saudi Arabia Dec 29 2020 This book is a comprehensive study on the education system of Saudi Arabia, placing the reforms and changes it has undergone in the past two decades within the context of the historical evolution of the education system. An education system cannot be seen in isolation of the society; it plays a significant role in shaping the individual, state and the society, that in turn, have a bearing on the education system and its evolution. Therefore, this book locates Saudi education in the backdrop of the changes in the society, how they have facilitated or hindered the education reforms and how the education reforms have impacted the society. The book does not ignore the immediate trigger for the beginning of a comprehensive reforms process but goes beyond it to find much deeper socio-political and economic rationales that paved the way for the reforms. It provides a nuanced understanding of the interplays of various socioeconomic as well as political factors that have shaped the education system in Saudi Arabia.

Methanol Dec 21 2022 This monograph is based on methanol as a fuel for transportation sector, specifically for compression ignition (CI) engines. The contents present examples of utilization of methanol as a fuel for CI engines in different modes of transportation such as railroad, personal vehicles or

heavy duty road transportation. The book also focuses on effect of methanol on combustion and performance characteristics of the engine. The effect of methanol on exhaust emission production, prediction and control is also discussed. It also discusses current methanol utilization and its potential, its effect on the engine in terms of efficiency, combustion, performance, pollutants formation and prediction. Part of the chapters are based on review of state-of-the-art while other chapters are dedicated to an original research. This volume will be a useful guide to professionals and academics involved in alternative fuels, compression ignition engines, and environmental research.

DOD, State, and USAID Obligated Over \$17.7 Billion to About 7,000 Contractors and Other Entities for Afghanistan Reconstruction During Fiscal Years 2007-2009 Aug 17 2022

Jane's World Railways 2006-2007 Dec 17 2019 This directory gives the reader data on railway systems and railway equipment manufacturers across the globe. The text is split into two sections: a country-by-country listing of the railway systems of the world, and the railway manufacturing and services industries.

Offshore Oil and Gas Directory Jul 04 2021 This directory provides in-depth information on a range of suppliers and services, including named contacts, within the industry. The comprehensive nature of its coverage ensures high usage by operating companies and their branches throughout the world, plus offshore specifiers and contractors. It is aimed for use by key decision makers in all sectors of the industry including technical engineers, production managers and buyers, senior directors and managing directors.

Routing Protocols and Architectural Solutions for Optimal Wireless Networks and Security Dec 09 2021 Networking capabilities have been significantly enhanced in recent years.

With emerging advancements in technology, wireless communication has increased exponentially. *Routing Protocols and Architectural Solutions for Optimal Wireless Networks and Security* is a comprehensive resource on the latest technological advancements in designing secure wireless networks and secure transmission of data, voice and video over wireless networks and other innovations. Featuring comprehensive coverage across a range of relevant topics such as network planning, radio resource allocation, and broadband wireless networks, this publication is an ideal reference source for network designers, industries, researchers, educators, and governments who are involved in designing and implementing security and wireless networks and applications.

Proceedings of the II International Triple Helix Summit Oct 15 2019 This volume gathers the latest advances and innovations in the triple helix of university-industry-government relations, as presented by leading international researchers at the II International Triple Helix Summit 2018, held in Dubai, UAE on November 10-13, 2018, which brought together experts, practitioners and academics across disciplines that address the dynamics of government, industry and academia. It covers analysis, theory, measurements and empirical enquiry in all aspects of university-industry-government interactions, as well as the international bases and dimensions of triple helix relations, their impacts, and social, economic, political, cultural, health and environmental implications. It also examines the role of government/academia/industry in building innovation-based cities and nations, and in transforming nations into knowledge-based sustainable economies. The contributions, which were selected by means of a rigorous international peer-review process, highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaboration

among different specialists.

Handbook of Research on Lifestyle Sustainability and
Management Solutions Using AI, Big Data Analytics, and
Visualization Apr 20 2020 The sudden outbreak of the COVID-19 pandemic has curbed human lifestyle by imposing restrictions on regular daily movements that had been taken for granted. Due to the pandemic, the welfare segment has received more attention, and every possible effort is being made to prioritize the services at the top. This can be made possible while using the latest tools, technologies, and resources that impact the human culture and welfare of well-being. Novel methods and devices that make the welfare services more efficient, adaptive, transparent, and cost-effective need to be explored. The Handbook of Research on Lifestyle Sustainability and Management Solutions Using AI, Big Data Analytics, and Visualization offers extensive research on lifestyle management and services that contribute towards indication, detection, conduction, protection, and technological enhancement including machine learning, deep learning, artificial intelligence, big data analytics, and visualization. It also provides mechanisms that can improve lifestyle monitoring and help in increasing the immunity of the human body. Covering topics such as big data, robot therapy, and wearable technology, it is ideal for students, researchers, technologists, IT specialists, computer engineers, systems engineers, data scientists, doctors, hospital administrators, engineers, academicians, and technology providers.

Cloud Native Transformation Nov 27 2020 In the past few

years, going cloud native has been a big advantage for many companies. But it's a tough technique to get right, especially for enterprises with critical legacy systems. This practical hands-on guide examines effective architecture, design, and cultural patterns to help you transform your organization into a cloud native enterprise—whether you're moving from older architectures or creating new systems from scratch. By following Wealth Grid, a fictional company, you'll understand the challenges, dilemmas, and considerations that accompany a move to the cloud. Technical managers and architects will learn best practices for taking on a successful company-wide transformation. Cloud migration consultants Pini Reznik, Jamie Dobson, and Michelle Gienow draw patterns from the growing community of expert practitioners and enterprises that have successfully built cloud native systems. You'll learn what works and what doesn't when adopting cloud native—including how this transition affects not just your technology but also your organizational structure and processes. You'll learn: What cloud native means and why enterprises are so interested in it
Common barriers and pitfalls that have affected other companies (and how to avoid them)
Context-specific patterns for a successful cloud native transformation
How to implement a safe, evolutionary cloud native approach
How companies addressed root causes and misunderstandings that hindered their progress
Case studies from real-world companies that have succeeded with cloud native transformations

Web Information Systems Engineering – WISE 2018 Oct 27

2020 The two-volume set LNCS 11233 and LNCS 11234

constitutes the proceedings of the 19th International Conference on Web Information Systems Engineering, WISE 2018, held in Dubai, United Arab Emirates, in November 2018. The 48 full papers and 21 short papers presented were carefully reviewed

and selected from 209 submissions. The papers are organized in topical sections on blockchain, security, social network and security, social network, microblog data analysis, graph data, information extraction, text mining, recommender systems, medical data analysis, Web services and cloud computing, data stream and distributed computing, data mining techniques, entity linkage and semantics, Web applications, and data mining applications.

Asia Pacific Shipping Jan 18 2020

Frac Without a K Feb 17 2020 The book titled FRAC without a K is actually the third edition of the initial book written in 1985. I got the inspiration for the initial book , titled Stimulation Treatment handbook, from working with a young Engineer who was in distress because of cheating on frac treatments. The original book was designed to instruct personnel on how to oversee fracs-basically understand what was going on and what to expect from the service company. There was, sadly, felonious activity going on in the oilfield and I took it upon myself to do what I could to stop this behavior. The activity was pretty well eliminated when the very large lawsuit occurred between Parker and Parsley and BJ Services occurred in the late 80's. Without going into details the lawsuit was settled for 270 million dollars which was a huge sum in the late 80's. I have included the 1994 edition 2 to show the improvements and advances that have occurred in our industry in 27 years. I include the second edition to show where my mind might have changed but also to allow a younger generation to see where we came from. I placed a lot of emphasis on historical changes as well as discussing at length the waterfrac revolution. My very subjective comments on waterfracs, small sand and actual design of slick water treatments is indeed controversial but not to me. I can state there is nothing equivalent to this book in our industry. You can find

books with massive amount of equations or sales pitch phenomena but nothing anywhere as readable as FRAC without a K. I have included hopefully for your enjoyment, war stories and pictures and descriptions of directional kill blowouts I have attended worldwide.

What It Takes to Be a Leader with Passion Jan 22 2023 The business world has been witnessing volatile changes during the recent years. Organizations are besieged with demands, like never before. This scenario throws up multifarious and complex challenges for leaders who not only need to focus on the present but also possess foresight to envision far into the future. While it is incumbent for leaders to be more prudent and resilient to take care of their own growth, ardently engaging those whom they lead is also of equal significance. In this backdrop leaders need to inhale, exude and infuse intrinsic passion in themselves and others. What it Takes to be a Leader with Passion offers lucid and time-tested help to leaders, goading them to practice core values, upbeat attitudes and demonstrable competencies, while aligning themselves and their teams to deliver organizational objectives. The author has coherently weaved 33 pearls of passion, which can adorn the growth library of leaders, irrespective of where they are positioned in the organizational hierarchy. This offering provides leaders with incisive anecdotes and elegant models that are drawn from the huge reservoir of experiences gainfully acquired while partnering with multitude of corporate entities. These real-time stories and classics, enthuse the readers to relate, reflect and transform their ways of being. What it Takes to be a Leader with Passion is just the kind of book that leaders would love to grab, read, internalize and apply for enduring success and happiness, at work.

Molecular Tools for the Detection and Quantification of

Toxicogenic Cyanobacteria Jan 30 2021 A guide to state-of-the-

art molecular tools for monitoring and managing the toxigenicity of cyanobacteria Runaway eutrophication and climate change has made the monitoring and management of toxigenic organisms in the world's bodies of water more urgent than ever. In order to influence public policy regarding the detection and quantification of those organisms, it is incumbent upon scientists to raise the awareness of policy makers concerning the increased occurrence of toxigenic cyanobacteria and the threats they pose. As molecular methods can handle many samples in short time and help identify toxigenic organisms, they are reliable, cost-effective tools available for tracking toxigenic cyanobacteria worldwide. This volume arms scientists with the tools they need to track toxigenicity in surface waters and food supplies and, hopefully, to develop new techniques for managing the spread of toxic cyanobacteria. This handbook offers the first comprehensive treatment of molecular tools for monitoring toxigenic cyanobacteria. Growing out of the findings of the landmark European Cooperation in Science and Technology Cyanobacteria project (CYANOCOST), it provides detailed, practical coverage of the full array of available molecular tools and protocols, from water sampling, nucleic acid extraction, and downstream analysis—including PCR and qPCR based methods—to genotyping (DGGE), diagnostic microarrays, and community characterization using next-gen sequencing techniques. Offers an overview of the latest trends in the field, while providing a foundation for understanding and applying the tools and techniques described Provides detailed coverage of the full range of molecular tools currently available, with expert guidance on the analysis and interpretation of results Includes step-by-step guidance on standard operational procedures, including molecular tests used in environmental monitoring, with individual chapters devoted to each procedure

Complements the published Handbook of Cyanobacterial Monitoring and Cyanotoxin Analysis from the CyanoCOST project This handbook is an indispensable working resource for scientists, lab technicians, and water management professionals and an excellent text/reference for graduate students and supervisors who use molecular tools. It will also be of great value to environmental health and protection officials and policy makers.

Who Owns Whom Nov 08 2021

Jurisdiction and Arbitration Agreements in International Commercial Law Feb 11 2022 Arbitration and jurisdiction agreements are frequently used in transnational commercial contracts to reduce risk, gain efficacy and acquire certainty and predictability. Because of the similarities between these two types of procedural autonomy agreements, they are often treated in a similar way by courts and practitioners. This book offers a comprehensive study of the prerequisites, effectiveness, and enforcement of exclusive jurisdiction and arbitration agreements in international dispute resolution. It examines whether jurisdiction and arbitration clauses have identical effects in private international law and whether they have been or should be given the same treatment by most countries in the world. By comparing the treatment of these clauses in the US, China, UK and EU, Zheng Sophia Tang demonstrates how, in practice, exclusive jurisdiction and arbitration agreements are enforced. The book considers whether the Hague Convention on Choice of Court Agreements could be treated as a litigating counterpart to the New York Convention, and whether it could work successfully to facilitate judicial cooperation and party autonomy in international commerce. This book breaks new ground in combining updated materials in EU, US and UK law with unique resources on Chinese law and practice. It will be

valuable for academics and practitioners working in the field of private international law and international arbitration.

Water Resources Management and Sustainability Apr 01

2021 The book will be of interest to researchers and practitioners in the field of hydrology, environmental engineering, agricultural engineering, earth sciences, and watershed and range sciences, as well as to those engaged in water resources planning, development and management in arid and semi-arid areas. Given the lack of literature on arid regions, this book not only provides an assessment of water resource management in arid regions but also addresses solutions, and it can also be an outstanding textbook on water resources management and sustainability for arid regions. This volume in the Water Science and Technology Library includes selected papers that have been presented and discussed during the International Water Resources Management and Sustainability: Solutions for Arid Regions, 22–24 March 2022, Dubai, United Arab Emirates. The conference was organized by the National Water and Energy Center, UAE University, in collaboration with the South Australian Goyder Institute for Water Research, and the Department for Environment and Water, Government of South Australia. The conference attracted a large number of nationally and internationally well-known experts who have been at the forefront of water resources management and sustainability in arid and semi-arid regions. More than 55 countries, covering the five continents, were represented. The conference was designed to facilitate and encourage new perspectives on how science and innovative technologies can transform water management and sustainability in arid and semi-arid regions around the world. It addressed current challenges and priorities in water management and provided a forum to share knowledge, experiences, research, and discoveries.

Major Companies of Asia and Australasia: South East Asia Jul 24 2020

Applied Minds Jun 22 2020 Engineering comes in many forms. Dubai's Burj Khalifa—the world's tallest building—looks nothing like Microsoft's Office Suite, and digital surround sound doesn't work like a city-wide telecommunication grid. Yet these engineering feats have much in common. Applied Minds explores the unique visions and mental tools of engineers and reveals the enormous—and often understated—influence they wield in transforming problems into opportunities. Guru Madhavan's account pairs the innovators of modern history—Thomas Edison, the Wright brothers, Steve Jobs—with everything from ATMs and the ZIP code system to the disposable diaper. He peeks into the inner workings of complex systems and celebrates the men and women who shape our world. Anecdotal, insightful and ultimately visionary, Applied Minds charts a path to a future where we might apply strategies borrowed from engineering to create useful and inspired solutions to the world's most pressing challenges.

Dare to be Different Jun 15 2022 In this book, Dr Albert Hong tells his own story. Today, he is prominent in his field, as chairman of RSP Architects Planners and Engineers (Pte) Ltd. His life began 80 years ago, in a humble medical clinic in Neil Road, Singapore. In the years between, he has achieved success in business based on hard work and high aspirations. Albert Hong and RSP have grown as Singapore has grown, overcoming many of the challenges associated with a young, fast-developing nation. Albert Hong's early years were overshadowed by war and occupation. But he proved that adversity can be a springboard for achievement. His mother saved enough to finance his education at the prestigious Raffles Institution, and then further education in the UK, where he trained as an

architect. In 1964 Albert Hong joined Raglan Squire & Partners as an associate. He established himself in a profession previously dominated by expatriates, fought established notions of what an architectural practice could do, and demonstrated the value of an entrepreneurial spirit. Over the next 50 years, he transformed the firm. RSP has become one of the biggest, most successful and most respected architectural firms in Southeast Asia. Among his particular achievements is to establish the firm outside Singapore. Notably, he decided to enter the India market, in defiance of conventional wisdom and the advice of most of his colleagues. Events have proved him right. For RSP, India is a huge success story. For Dr Hong, success brings obligations. He has donated time and wise counsel to numerous public bodies. Like Singapore, he believes that every individual deserves a chance to realise his or her talents and abilities. Among many charitable contributions, he has always given generous support to educational institutions and deserving individuals. This is a very human success story, likely to inspire readers planning their careers. It is sure to interest all those interested in the physical development of Singapore, and the contributions of architects, planners, financiers, developers and other professionals.

Injunctive Relief and International Arbitration May 02 2021

This book explores from an English law and Institutional

perspective the various types of injunctive relief that are available to a party before and during arbitral proceedings. In particular, this book examines the basis of the power of English Courts to grant such injunctions and explains when such injunctions will be granted. It considers any limitations attached to such injunctions and the relationship between section 44 of the Arbitration Act 1996 and section 37 of the Senior Courts Act 1981. It also provides an in-depth analysis of case law and the emerging trends in this area of arbitration, as well as the powers of arbitrators under the ICC and LCIA Rules to grant such relief and other remedies that might be available to a party seeking to uphold an arbitration agreement. This book will be a vital reference tool for practitioners, arbitrators and postgraduate students.

Containerisation International Year Book Mar 20 2020

Web Information Systems Engineering – WISE 2018 Feb 28

2021 The two-volume set LNCS 11233 and LNCS 11234

constitutes the proceedings of the 19th International Conference on Web Information Systems Engineering, WISE 2018, held in Dubai, United Arab Emirates, in November 2018. The 48 full papers and 21 short papers presented were carefully reviewed and selected from 209 submissions. The papers are organized in topical sections on blockchain, security, social network and security, social network, microblog data analysis, graph data, information extraction, text mining, recommender systems, medical data analysis, Web services and cloud computing, data stream and distributed computing, data mining techniques, entity linkage and semantics, Web applications, and data mining applications.

List of Shipowners & Managers Nov 20 2022

Enforceability of Multi-Tiered Dispute Resolution Clauses

Jan 10 2022 This book analyses the contractual mechanisms

requiring parties to exhaust a selected amicable dispute resolution procedure before proceedings in court or arbitration are initiated. It briefly explains the phenomenon of integrated dispute resolution, outlines ADR methods commonly used in multi-tiered clauses and presents the overview of standard clauses published by various ADR providers and professional bodies. The core of the analysis is devoted to the enforceability of multi-tiered clauses under the legal systems of England and Wales, Germany, France and Switzerland. It is essential reading for practitioners and academics working in this area.

ICREGA'14 - Renewable Energy: Generation and Applications

Sep 06 2021 This book collects the edited and reviewed contributions presented in the 3rd International Conference on Renewable Energy: Generation and Applications" ICREGA'14, organized by the UAE University in Al-Ain. This conference aims to disseminate knowledge on methods, policies and technologies related to renewable energy and it acknowledges the leadership of the UAE which committed to a 7% renewable energy target by 2020. The demands and developments in renewable energy generations and applications are rapidly growing and are facing many challenges on different levels such as basic science, engineering system design, energy policies and sustainable developments. This edition presents new contributions related to recent renewable energy case studies, developments in biofuel, energy storage, solar and wind energy, integrated systems and sustainable power production. In the spirit of the ICREGA'14, the volume has been produced after the conference so that the authors had the possibility to incorporate comments and discussions raised during the meeting. The contributions have been grouped in the following topics: - Efficient Energy Utilization - Electrical Energy Market, Management and Economics - Energy Storage Systems -

Environmental Issues - Fuel Cells Systems - Green Buildings - Intelligent Energy/Power Transmission and Distribution - Solar Photovoltaic and Thermal Energy - Wind Energy Systems.

Spring Web Services Cookbook Aug 25 2020 This is a cookbook full of recipes with the essential code explained clearly and comprehensively. Each chapter is neatly compartmentalized with focused recipes which are perfectly organized for easy reference and understanding. This book is for Java/J2EE developers. As the book covers a variety of topics in Web-Service development, it will serve as a reference guide to those already familiar with Web-Services. Beginners can also use this book to gain real-world experience of Web-Service development.

PERT and CPM May 22 2020 ?**ABOUT THE BOOK** The book presents the basic concepts of the project management techniques namely PERT & CPM. It is primarily meant for the students studying in various universities for their first degree course in Engineering, Commerce and Management. It will also be useful for the students taking professional examinations of the Cost and Works Accounts, Chartered Accountants and the Institution of Engineers. The inservice personnel working in various projects would also find the book quite useful. In the treatment of the subject emphasis has been laid to present it in a simple language so that it may be easily understood by the readers. The text is profusely illustrated with diagrams. All important concepts are illustrated with worked examples and a large number of problems and multiple choice questions are given. Thus the book will be useful for the various competitive examinations such as Engineering Services and ICS examinations. ?**OUTSTANDING FEATURES:** -All the text has been explained in a simple language. -This book will be useful for various branches, competitive examinations, engineering

services and ICS Examinations. -Number of problems have been solved in detail. -Subject matter is supported by very good diagrams. -The price of this book itself is a big consideration.

?RECOMMENDATIONS: A textbook for all Engineering Branches, Competitive Examination, ICS, and AMIE Examinations ?ABOUT THE AUTHOR: Dr. P.N. Modi B.E., M.E., Ph.D., MIE Former Professor of Civil Engineering M.R. Lloyd's List Ports of the World Mar 12 2022

Mediation and Commercial Contract Law Apr 13 2022 There is an urgent need to better understand the legal issues pertaining to alternative dispute resolution (ADR), particularly in relation to mediation clauses. Despite the promotion of mediation by dispute resolution providers, policy makers, and judges, use of mediation remains low. In particular, problems arise when parties lack certainty regarding the legal effect of a mediation clause, and the potential uncertainty regarding the binding nature of agreements to pursue mediation is problematic and threatens the growth of ADR. This book closely examines the importance and complexity of mediation clauses in commercial contracts to remedy this persistent uncertainty. Using comparative law methods and detailed empirical research, it explores the creation of a comprehensive framework for the mediation clause.

Providing valuable insight into the process of ADR and mediation, this book will be of interest to academics, law makers, law students, in-house council, lawyers, as well as parties interesting in drafting enforceable mediation clauses.

Applied Minds Nov 15 2019 A journey inside the minds that build our world. Dubai's Burj Khalifa—the world's tallest building—looks nothing like Microsoft's Office Suite, and digital surround sound doesn't work like a citywide telecommunication grid. Yet these engineering feats have much in common. Applied Minds explores the unique visions and mental tools of engineers to reveal the enormous—and often understated—influence they wield in transforming problems into opportunities. The resulting account pairs the innovators of modern history—Thomas Edison, the Wright brothers, Steve Jobs—with everything from ATMs and the ZIP code system to the disposable diaper. An engineer himself, Guru Madhavan introduces a flexible intellectual tool kit called modular systems thinking as he explains the discipline's penchant for seeing structure where there is none. The creations that result from this process express the engineer's answers to the fundamental questions of design: usefulness, functionality, reliability, and user friendliness. Through narratives and case studies spanning the brilliant history of engineering, Madhavan shows how the concepts of prototyping, efficiency, reliability, standards, optimization, and feedback are put to use in fields as diverse as transportation, retail, health care, and entertainment. Equal parts personal, practical, and profound, Applied Minds charts a path to a future where we apply strategies borrowed from engineering to create useful and inspired solutions to our most pressing challenges.

Contemporary Logistics in China Aug 05 2021 This book carries on the ideal of providing a systematic exposition of the

logistics development in China to the English-reading community at large in the spirit of the four predecessor volumes, published in previous years. This book is the fifth volume in a series entitled "Contemporary Logistics in China", authored by the researchers in Logistics Center at Nankai University. Specially, the opening chapter of this book presents a synopsis of the intent, the history, the framework, the topical coverage and the train of thought of the sequel in the latest five years. As the previous four volumes, our ultimate aim and desire is to present a timely portrayal of the rapid pace of growth of China's logistics market and the status of its logistics industry's evolution.

The Gulf Directory Feb 23 2023

Dubai Amplified Oct 19 2022 Following the British withdrawal in 1971, the Gulf Region entered a heady period of political restructuring, awash with oil money that helped fund national aspirations. Infrastructure investment became a central part of the region's nation-building initiatives and fueled strong competition. Without its neighbours' oil fields, infrastructure and territorial development became particularly vital to Dubai. This book provides a unique and detailed understanding of Dubai urbanism by demonstrating that cumulative programmatic intensification and scalar amplification of its large-scale infrastructural components guided its metropolitan growth and generated a territorial organization logic that outstripped the predictive capacity of traditional Western master planning. Dubai's rapid series of infrastructural projects culminated in the Jebel Ali Port, Industrial Area, and Free Zone, which marked a definitive "before and after" point. The book shows how Jebel Ali also became the template for subsequent developments, Dubai World Holdings Company's international aspirations, and the agencies that manage and regulate Dubai's large-scale

infrastructural projects today. Dubai Amplified highlights the cycle of typological borrowing, prototypical replication, and scalar amplification, specifically in Dubai's infrastructure projects, to best describe its general territorial development. While infrastructure is traditionally understood as the elemental "hardware" that undergirds urban development, the book concludes by arguing that the definition should be expanded in this case as more of a set of objects, networks, and services that cities can selectively borrow, replicate, and amplify.

Proceedings of the International Conference on Data Engineering 2015 (DaEng-2015) Sep 25 2020 These

proceedings gather outstanding research papers presented at the Second International Conference on Data Engineering 2015 (DaEng-2015) and offer a consolidated overview of the latest developments in databases, information retrieval, data mining and knowledge management. The conference brought together researchers and practitioners from academia and industry to address key challenges in these fields, discuss advanced data engineering concepts and form new collaborations. The topics covered include but are not limited to:

- Data engineering
- Big data
- Data and knowledge visualization
- Data management
- Data mining and warehousing
- Data privacy & security
- Database theory
- Heterogeneous databases
- Knowledge discovery in databases
- Mobile, grid and cloud computing
- Knowledge management
- Parallel and distributed data
- Temporal data
- Web data, services and information engineering
- Decision support systems
- E-Business engineering and management
- E-commerce and e-learning
- Geographical information systems
- Information management
- Information quality and strategy
- Information retrieval, integration and visualization
- Information security
- Information systems and technologies
