Composition in the University Nov 08 2021 Composition in the University examines the required introductory course in composition within American colleges and universities. Crowley argues that due to its association with literary studies in English departments, composition instruction has been inappropriately influenced by humanist pedagogy and that modern humanism is not a satisfactory rationale for the study of writing. Crowley envisions possible nonhumanist rationales that could be developed for vertical curricula in writing instruction, were the universal requirement not in place. Composition in the University examines the required introductory course in composition within American colleges and universities. According to Sharon Crowley, the required composition course has never been conceived in the way that other introductory courses have been--as an introduction to the principles and practices of a field of study. Rather it has been constructed throughout much of its history as a site from which larger educational and ideological agendas could be advanced, and such agendas have not always served the interests of students or teachers, even though they are usually touted as programs of study that students "need." If there is a master narrative of the history of composition, it is told in the institutional attitude that has governed administration, design, and staffing of the course from its beginnings--the attitude that the universal requirement is in place in order to construct docile academic subjects. Crowley argues that due to its association with literary studies in English departments, composition instruction has been inappropriately influenced by humanist pedagogy and that modern humanism is not a satisfactory rationale for the study of writing. She examines historical attempts to reconfigure the required course in nonhumanist terms, such as the advent of communications studies during the 1940s. Crowley devotes two essays to this phenomenon, concentrating on the furor caused by the adoption of a communications program at the University of Iowa. Composition in the University concludes with a pair of essays that argue against maintenance of the universal requirement. In the last of these, Crowley envisions possible nonhumanist rationales that could be developed for vertical curricula in writing instruction, were the universal requirement not in place. Crowley presents her findings in a series of essays because she feels the history of the required composition course cannot easily be understood as a coherent narrative since understandings of the purpose of the required course have altered rapidly from decade to decade, sometimes in shockingly sudden and erratic fashion. The essays in this book are informed by Crowley's long career of teaching composition, administering a composition program, and training teachers of the required introductory course. The book also draw on experience she gained while working with committees formed by the Conference on College Composition and Communication toward implementation of the Wyoming Resolution, an attempt to better the working conditions of post-secondary teachers of writing.

Landmark Essays on Advanced Composition Sep 06 2021 As advanced composition continues to grow as an important sub-area of rhetoric and composition, it becomes increasingly more important for scholars and teachers to have access to key studies produced in the field. Providing a comprehensive overview of significant work on the theory and pedagogy of advanced composition generated between 1980 and 1995, this collection contains 24 essays and articles previously published in major scholarly books and journals. Divided into four major areas, this book: * explores how individuals and institutions over the last 15 years have constructed advanced composition courses and programs, * attempts to articulate what

distinguishes advanced composition courses, students, and pedagogies from those commonly encountered in first-year composition, * outlines specific pedagogies for advanced composition, and * investigates how scholarship can inform advanced composition and examines several political and ethical issues. The essays presented here chronicle composition's struggle to define and construct an appropriate writing course on the advanced level. Although these essays have clear historical value -- in that together they trace attempts to come to terms with advanced composition -- they also have implications for future work in the area. They suggest how educators might continue to draw on scholarship both within and outside of composition to investigate relevant theoretical issues and to construct effective advanced pedagogies.

Collaborative Learning and Writing Sep 25 2020 Although most writing instructors know the benefits of collaborative learning and writing in college writing classes, many remain unsure how to implement collaborative techniques successfully in the classroom. This collection provides a diversity of voices that address the "how tos" of collaborative learning and writing by addressing key concerns about the process. Fresh essays consider the importance of collaborative work and peer review, the best ways to select groups in classes, integration of collaborative learning techniques into electronic environments, whether group learning and writing are appropriate for all writing classes, and ways special populations can benefit from collaborative activities. Despite its challenges, collaborative learning can prove remarkably effective and this study provides the advice to make it work smoothly and successfully.

Crafting Presence Jun 03 2021 Essays are central to students' and teachers' development as thinkers in their fields. In *Crafting Presence*, Nicole B. Wallack develops an approach to teaching writing with the literary essay that holds promise for writing students, as well as for achieving a sense of common purpose currently lacking among professionals in composition, creative writing, and literature. Wallack analyzes examples drawn primarily from volumes of *The Best American Essays* to illuminate the most important quality of the essay as a literary form: the writer's "presence." She demonstrates how accounting for presence provides a flexible and rigorous heuristic for reading the contexts, formal elements, and purposes of essays. Such readings can help students learn writing principles, practices, and skills for crafting myriad presences rather than a single voice. *Crafting Presence* holds serious implications for writing pedagogy by providing new methods to help teachers and students become more insightful and confident readers and writers of essays. At a time when liberal arts education faces significant challenges, this important contribution to literary studies, composition, and creative writing shows how an essay-centered curriculum empowers students to show up in the world as public thinkers who must shape the "knowledge economy" of the twenty-first century.

The Norton Sampler Nov 20 2022 W. W. Norton & Company is proud to present the Sixth Edition of *The Norton Sampler*. As a rhetorically arranged collection of short essays for composition, our Sampler echoes the cloth samplers once done in colonial America, presenting the basic patterns of writing for students to practice just as schoolchildren once practiced their stitches and ABCs on needlework samplers. This new edition shows students that description, narration, and the other patterns of exposition are not just abstract concepts used in composition classrooms but are in fact the way we think--and write. The Norton Sampler contains 63 carefully chosen readings--classics as well as more recent pieces, essays along with a few real-world texts--all demonstrating how writers use the modes of discourse for many varied purposes.

Composition/rhetoric Aug 25 2020 In this eclectic selection of 27 essays, Winterowd presents a comprehensive and up-to-date discussion of the theory and practice of composition. Winterowd relates composition to the fields of literacy and rhetoric, moving easily between topics as diverse as brain theory and stylistics. The essays blend the speculative with the specific, the abstract with the actual, as Winterowd seeks a balance between theory and application. The book is divided into two sections. Part I, “The Field of Composition/Rhetoric,” constitutes a state-of-the-art essay on composition. Part 2, “Essays on Composition/Rhetoric,” develops the themes introduced in the first part.

Composition, Non-composition Oct 15 2019 In architecture, composition refers to the conception of a building according to principles of regularity and hierarchy, or according to the principles of obtaining equilibrium. However, it is not until the beginning of the nineteenth century that the notion of composition becomes truly associated with architectural conception, notably under the influence of Jean-Nicolas-Louis Durand and his statement on the *Marche à suivre dans la composition d'un projet quelconque* [Procedure to be followed in the composition of any project]. The concept quickly erodes during the twentieth century, with the adoption of neutral architectural devices, the use of aggregative processes, and the adoption of "objective" operations, all of which can be understood as an attempt to move beyond compositional principles. In *Composition, Non-Composition*, Jacques Lucan invites his readers to consider this novel historical perspective of architectural theory. The author describes the interaction of ideas that often clash with one another, with some that fade away as others emerge, thus offering invaluable keys to understanding contemporary architecture. Although this book is primarily addressed to students of architecture, it will also appeal to architects, historians of architecture, as well as to the interested

public.

Writing on the Margins Sep 18 2022 A collection of twenty-one essays by David Bartholomae, *Writing on the Margins* includes selections that have helped shape the discipline of composition studies. Renewing Rhetoric's Relation to Composition Apr 01 2021 *Renewing Rhetoric's Relation to Composition* comprehensively examines the development of rhetoric and composition, using the writings of Theresa Jarnagin Enos as points of departure for studies of broader trends. Chapters explore such topics as the historical relations of rhetoric and composition, their evolution within programs of study, and Enos's research on gender. The volume presents the growing disjunction between rhetoric and composition and paints a compelling picture of the current state of both disciplines as well as their origins. This volume acknowledges the influential role that Theresa Enos has had in the writing and rhetoric disciplines. Her career provides benchmarks for plotting developments in rhetoric and composition, including the evolving relations between the two. This collection offers a tribute to her work and to the new directions in the discipline stemming from her research. With an all-star line-up of contributors, it also represents the state of the art in rhetoric and composition scholarship, and it will serve current and future scholars in both disciplines.

Teaching Lives Dec 17 2019 In *Teaching Lives*, Wendy Bishop gathers twenty-three of her own critical essays from diverse sources, and sets them in the context of her current thinking about composition and teaching. Individually, these essays address a range of critical and pedagogical issues in the teaching of writing. As a collection, they represent Bishop's best work and make a coherent, accessible statement from a prominent scholar at mid-career. This "portable Bishop," then, will give readers in one volume what has been unique about Bishop's prolific contribution to composition studies since the mid-1980s. Pedagogically process- and response-oriented, she advocates invention-based, exploratory writing for students at all levels. As a researcher, her approach is ethnographic. And in her work with new teachers, she encourages self-study--teacher-research and reflection--as a means toward an informed professional stance. *Teaching Lives* combines her interest in composition, literature, research, and creative writing and explores the connections among them. Above all, throughout this important work, Bishop affirms and celebrates teaching, the teacher's life, and living a life in teaching.

The Norton Sampler Feb 11 2022 The Norton Sampler is a collection of short essays for composition students. Like the cloth samplers that schoolchildren produced in colonial times to practice their stitches (and, at the same time, their ABCs), The Norton Sampler is based on the assumption that writing is a practical art that can be learned by studying some basic rhetorical patterns -- narration, description, comparison, and the like. Book jacket.
